as one of the best There should be a copy of it in every college library Association of Motor Vehicle Teachers Newsletter The
Motor Vehicle has been an essential reference work for both the student and practising engineer ever since the first edition
appeared in 1929 Today it is as indispensable to anyone with a serious interest in vehicle design techniques systems and
construction as it was then The current edition has undergone a major revision to include seven new chapters These include
Electric Propulsion covering all aspects from lead acid and alternative batteries to fuel cells and hybrid vehicles Static and
Dynamic Safety and Wheels and Tyres The chapter on the compression ignition engine has been expanded to form three
chapters concentrating on aspects such as common rail injection recently developed distributor type pumps and electronic
control of injection Automatic semi automatic and continuously variable ratio transmissions are covered in two new chapters
A third contains information on the latest developments in computer aided control over both braking and traction for
improving vehicle stability while another contains entirely new information on the practice and principles of electrically
actuated power assisted steering Also included is coverage of material detailing the latest knowledge and practice relating to
safety systems vehicle integrity braking systems and much more The established layout of the book is retained with topics
relating to the Engine Transmission and Carriage Unit dealt with in turn Each chapter is well provided with diagrams
sections schematics and photographs all of which contribute to a clear and concise exposition of the material under
discussion Latest extensive revisions to a well established title New chapters on electric propulsion and vehicle safety
