Manual D Residential Duct Systems:

Residential Duct Systems Hank Rutkowski, 2011 *Residential Duct Systems - Manual D* Acca, Hank Rutkowski, 2017-02

The Third Edition of ANSI ACCA Manual D is the Air Conditioning Contractors of America procedure for sizing residential duct systems. This procedure uses Manual J ANSI ACCA Eighth Edition heating and cooling loads to determine space air delivery requirements. This procedure matches duct system resistance pressure drop to blower performance as defined by manufacturer's blower performance tables. This assures that appropriate airflow is delivered to all rooms and spaces and that system airflow is compatible with the operating range of primary equipment. The capabilities and sensitivities of this procedure are compatible with single zone systems and multi zone air zoned systems. The primary equipment can have a multi speed blower PSC motor or a variable speed blower ECM or constant torque motor or a true variable speed motor. Edition Three Version 2.50 of Manual D D3 specifically identifies normative requirements and specifically identifies related informative material.
