successfully used in actual industrial projects while others are from the forefront of research. Authors include practitioners, business thinkers, academics, and applied mathematicians. These seemingly different papers address different aspects of a single problem: taming complexity. Behavioral Specifications of Businesses and Systems emphasizes simplicity and elegance in specifications without concentrating on particular methodologies, languages, or tools. It shows how to handle complexity and specifically how to succeed in understanding and specifying businesses and systems based upon precise and abstract concepts. It promotes reuse of such concepts and of constructs based on them without taking reuse for granted. Behavioral Specifications of Businesses and Systems is the second volume of papers based on a series of workshops held alongside ACM's annual conference on Object Oriented Programming Systems Languages and Applications OOPSLA and European Conference on Object Oriented Programming ECOOP. The first volume, Object Oriented Behavioral Specifications, edited by Haim Kilov and William Harvey, was published by Kluwer Academic Publishers in 1996. *Emerging Cutting-Edge Developments in Intelligent Traffic and Transportation Systems* M. Shafik, 2024-03-05. With the advent and development of AI and other new technologies, traffic and transportation have changed enormously in recent years, and the need for more environmentally friendly solutions is also driving innovation in these fields. This book presents the proceedings of ICITT 2023, the 7th International Conference on Intelligent Traffic and Transportation, held from 18-20 September 2023 in Madrid, Spain. This annual conference is becoming one of the leading international conferences for presenting novel and fundamental advances in the fields of intelligent traffic and transportation. It also serves to foster communication among researchers and practitioners working in a wide variety of scientific areas with a common interest in intelligent traffic and transportation and related techniques. ICITT welcomes scholars and researchers from all over the world to share experiences and lessons with other enthusiasts and develop opportunities for cooperation. The 27 papers included here represent an acceptance rate of 64% of submissions received and were selected following a rigorous review process. Topics covered include autonomous technology, industrial automation, artificial intelligence, machine learning, deep and cognitive learning, distributed networking, transportation in future smart cities, hybrid vehicle technology, mobility, cyber-physical systems, design and cost engineering, enterprise information management, product design, intelligent automation, ICT-enabled collaborative global manufacturing, knowledge management, product service systems, optimization, product lifecycle management, sustainable systems, machine vision, Industry 4.0, and navigation systems. Offering an overview of recent research and current practice, the book will be of interest to all those working in the field. *Management, a Bibliography for NASA Managers*, 1985.
