**Applied Mechanics Reviews** ,1972      Use of Computers in the Coal Industry 1986 Y.J. Wang,2020-08-27 This book is an outcome of the third conference on the use of computers in the coal industry in Morgantown It presents valuable computer applications covering the most aspects of coal industry and covers following areas mine management and economics surface mining coal preparation and blasting      **Underground Gas Storage** D. J. Evans,R. A. Chadwick,2009 The UK became a net importer of natural gas in 2004 and by 2020 will import up to 90% of its requirements leaving it vulnerable to increasing energy bills and risk of disruption to supply New pipelines to Europe and improvements to interconnectors will meet some demand but Government recognises the need for increased gas storage capacity best met by the construction of underground storage facilities Energy security has also raised the likelihood of a new generation of coal fired power stations which to be environmentally viable will require clean coal technologies with near zero greenhouse gas emissions A key element of this strategy will be underground CO<sub>2</sub> storage This volume reviews the technologies and issues involved in the underground storage of natural gas and CO<sub>2</sub> with examples from the UK and overseas The potential for underground storage of other gases such as hydrogen or compressed air linked to renewable sources is also reviewed
