Mission Risk Board Game:

A Board Game Education Jeffrey P. Hinebaugh, 2009-07-16 A Board Game Education is an entertaining and valuable resource for parents teachers educators and anyone who appreciates the fun and entertainment provided by classic traditional board games The book provides an informative analysis of how classic board games that everyone has played_and probably owns_are not only great family entertainment but also develop core educational skills that have been proven to lead to academic achievement Through A Board Game Education readers learn a bit of the fascinating history trivia and little known facts regarding the most loved board games of all time i e how Monopoly was used by WWII POWs to escape At the same time Hinebaugh identifies the distinct educational skills developed by each of these games and explores in detail how the play of these games cultivates such skills A Board Game Education also provides valuable suggestions about how to modify and vary these classic board games to specifically enhance additional core educational skills and concepts Who would have thought that Candy Land could be modified into a strategy game and Chutes and Ladders could be used to teach algebraic equations and advanced math

War Games Philip Hammond, Holger Pötzsch, 2019-12-12 Many of today's most commercially successful videogames from Call of Duty to Company of Heroes are war themed titles that play out in what are framed as authentic real world settings inspired by recent news headlines or drawn from history While such games are marketed as authentic representations of war they often provide a selective form of realism that eschews problematic yet salient aspects of war In addition changes in the way Western states wage and frame actual wars makes contemporary conflicts increasingly resemble videogames when perceived from the vantage point of Western audiences This interdisciplinary volume brings together scholars from games studies media and cultural studies politics and international relations and related fields to examine the complex relationships between military themed videogames and real world conflict and to consider how videogames might deal with history memory and conflict in alternative ways It asks What is the role of videogames in the formation and negotiation of cultural memory of past wars How do game narratives and designs position the gaming subject in relation to history war and militarism And how far do critical anti war peace games offer an alternative or challenge to mainstream commercial titles

Enabling Foundation for NASA's Earth and Space Science Missions National Research Council, Division on Engineering and Physical Sciences, Space Studies Board, Committee on the Role and Scope of Mission-Enabling Activities in NASA's Space and Earth Science Missions, 2010-02-25 NASA's space and Earth science program is composed of two principal components: spaceflight projects and mission enabling activities. Most of the budget of NASA's Science Mission Directorate (SMD) is applied to spaceflight missions but NASA identifies nearly one quarter of the SMD budget as mission enabling. The principal mission enabling activities which traditionally encompass much of NASA's research and analysis: R suborbital payloads and flights and complementary ground based programs, advanced technology development and advanced mission and instrumentation concept studies. While the R & A program is essential to the development and support of NASA's diverse set of space and Earth science missions, defining and articulating an appropriate scale for mission enabling activities have posed a challenge throughout NASA's history. This volume identifies the appropriate roles for mission enabling activities and metrics for assessing their effectiveness. Furthermore, the book evaluates how, from a strategic perspective, decisions should be made about balance between mission related and mission enabling elements of the overall program as well as balance between various elements within the mission enabling component. Collectively, these efforts will help SMD to make a good program even better.

From Research to Practice in the Design of Cooperative Systems: Results and Open Challenges Julie Dugdale, Cédric Masclet, Maria Antonietta Grasso, Jean-François Boujut, Parina Hassanaly, 2012-06-19. COOP 2012 is the tenth COOP conference marking twenty years from the first conference in 1992. In this special anniversary edition, we asked researchers and practitioners to reflect on what have been the successes and the failures in designing cooperative systems and what challenges still need to be addressed. We have come a long way in understanding the intricacies of cooperation and in designing systems that support work practices and collective activities. These advances would not have been possible without the concerted effort of contributions from a plethora of domains including CSCW, HCI, Information Systems, Knowledge Engineering, Multi agent systems, organizational and management sciences, sociology, psychology, anthropology, ergonomics, linguistics, etc. The COOP community is going from strength to strength in developing new technologies, advancing and proposing new methodological approaches and forging theories.
