In a study released, 87% of workers worldwide are mentally detached from their work environments and are less likely to be efficient; making work a source of frustration instead of among satisfaction. (Gallup, 1993) The data highlight a lack of dedication to knowing and understanding of one's own strengths and weak points, amongst the population. Individuals need to believe about the individual they are and where their strengths and weaknesses lie due to the fact that if they do not stop to consider what they're great at and what they need to enhance, they will discover themselves in the 87% of the population who don't enjoy what they do. Following this discovery, I finished a personality test on 16Personalities. com that stated my strengths and weak points following responding to a series of questions, in wish to have a much better understanding to how my strengths and weaknesses play into the role as a paramedic. My strengths of being able to work well in a group setting, having excellent interaction skills and being altruistic will help me as a paramedic, while these are vital characteristics to ending up being a great paramedic. It is necessary for paramedics to be excellent team gamers and be trustworthy due to the fact that paramedics are typically put scenarios where they have to work with other individuals (like the authorities and firemens) where we have to trust each other and work well together in a circumstance where we are required to rely to an excellent extent potentially for our own well-being, and everyone else on scene. The test also showed that I "instinctively know how to capture an audience, and pick up on mood and motivation in ways that allow them to communicate with reason, emotion, passion, restraint - whatever the situation calls for", further elaborating saying that I can shift my tone and manner to reflect the needs of the audience, while still maintaining my own voice. These great communication skills are a crucial part to the career as it will allow a more accurate assessment of the situation through uncovering what happened, how many people were involved or whether there is any remaining danger. Being able to talk to people and keep both patients and family or others on the scene calm can make the situation easier to control, and maintaining conversation with a patient can help to retrieve important information that may be needed for their treatment. It was uncovered that I have an unyielding desire to do good for others and for...
