## My Unisa Exam Papers:

*South African Journal of Higher Education*, 2007      A Man without Ambition (eBook) Arnold Mol, 2012-11-20 A MAN WITHOUT AMBITION is Dr Arnold Mol's autobiography written with the purpose of giving his grandchildren some insight into part of their historical heritage. Even though his family and friends were surprised by the title, Dr Mol says that his life has been characterized by responding to opportunities that have come his way rather than purposefully planning to achieve something. A MAN WITHOUT AMBITION begins with Dr Mol recounting the drama surrounding his birth in Holland shortly before the end of the Second World War. He then reflects on the past 68 blessed years of his life about immigrating to South Africa, growing up, the love of his life, his first job, his missionary calling to South America, becoming a parent, and his deep gratitude towards the Lord. A MAN WITHOUT AMBITION makes for rather entertaining reading with many anecdotes, and readers will see how blessed life can be when they trust God and put their faith in Him alone.      South African Pressclips, 1990-05      **ICT Education** Stefan Gruner, 2016-10-15 This book constitutes the refereed proceedings of the 45th Annual Conference of the Southern African Computer Lecturers Association on ICT Education SACL A 2016 held in Cullinan, South Africa, in July 2016. The three revised full papers and 13 work-in-progress papers presented together with two invited keynote papers were carefully reviewed and selected from 30 submissions. The papers are organized in topical sections on assessment methods, instruction methods, new curricula, social skills, and various experiences.      *New Technologies for Energy Transition Based on Sustainable Development Goals* Kaviyarasu Kasinathan, Rasiyah Ladchumananandasivam, S. Beer Mohamed, 2024-08-02 This book describes numerous issues and brings an improved understanding of a key agenda item for the sustainable development goals (SDGs). The SDGs represent an urgent call for action by all countries, developed and developing, working jointly within the global community. A few of the industries it supports include food processing, energy, biomedical science, space research, drug delivery, and biosensors. This book highlights multidisciplinary solutions for protecting the environment while ensuring the future of our planet. The book mainly targets undergraduates, postgraduates, and doctoral students who are working in materials science and researchers across the world working in interdisciplinary research for climate change for sustainable growth.      **Higher education in a globalising world** Peter Mayo, 2019-07-04 This book focuses on current policy discourse in Higher Education with special reference to Europe. It discusses globalisation, Lifelong Learning, the EU's Higher Education discourse, this discourse's regional ramifications, and alternative practices in Higher Education from both the minority and majority worlds with their different learning traditions and epistemologies. It argues that these alternative practices could well provide the germs for the shape of a public good-oriented Higher Education for the future. It theoretically expounds on important elements to consider when engaging Higher Education and communities, discussing the nature of the term community itself. Special reference is accorded to the difference that lies at the core of these ever-changing communities. It then provides an analysis of an on-the-ground project in University community.
