Classification Luca Mesin, 2021-05-26 Biomedical image processing is an interdisciplinary field involving a variety of disciplines e.g. electronics, computer science, physics, mathematics, physiology and medicine. Several imaging techniques have been developed providing many approaches to the study of the human body. Biomedical image processing is finding an increasing number of important applications in, for example, the study of the internal structure or function of an organ and the diagnosis or treatment of a disease. If associated with classification methods, it can support the development of computer-aided diagnosis CAD systems which could help medical doctors in refining their clinical picture. *MyLab French with Pearson EText -- Access Card -- for Chez Nous* Albert Valdman, 2006
