If you like this book, write a review: [Darwin's Laboratory](#). Roy M. MacLeod, Philip F. Rehbock, 1994-01-01. No scientific traveler was more influenced by the Pacific than Charles Darwin, and his legacy in the region remains unparalleled. Yet the extent of the Pacific's impact on the thought of Darwin and those who followed him has not been sufficiently grasped. In this volume of essays, sixteen scholars explore the many dimensions—biological, geological, anthropological, social, and political—of Darwinism in the Pacific. Fired by Darwinian ideas, nineteenth-century naturalists within and around the Pacific rim worked to further Darwin's programs in their own research. In Seattle, conchologist P. Brooks Randolph; in Honolulu, evolutionist John Thomas Gulick; in Adelaide, botanist Richard Schomburgk; and in Malaysia, biogeographer Alfred Russel Wallace. Lesser-known enthusiasts furnished Darwin with fresh material and replied to his endless inquiries, while young aspiring biologists from Cambridge tested Darwinian ideas directly.

in the laboratory of the Pacific But the implications of Darwinism for the understanding of human nature and history turned it into a public theory as well as a scientific one Anthropologists geographers missionaries politicians and social commentators from Australia to Japan all found ways to adapt Darwinism to their own agendas Darwin s Laboratory demonstrates the variety and richness of Darwinian ideas in the Pacific and in so doing shows how the region functioned as a testing ground for the theory of evolution Further it illustrates how Darwinian ideas and their European contexts helped invent and define the particular conception we have of the Pacific Both the general reader and the specialist will find controversy illumination and entertainment in this the first book to probe the extent of Darwinism and Darwinian thinking in the Pacific Advanced Biology Frank Merrill Wheat,Elizabeth T. Fitzpatrick,1929 This comprehensive textbook covers a wide range of topics in advanced biology including genetics biochemistry and molecular biology Written by two leading experts in the field the book is an indispensable resource for students studying biology at the undergraduate and graduate levels This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work is in the public domain in the United States of America and possibly other nations Within the United States you may freely copy and distribute this work as no entity individual or corporate has a copyright on the body of the work Scholars believe and we concur that this work is important enough to be preserved reproduced and made generally available to the public We appreciate your support of the preservation process and thank you for being an important part of keeping this knowledge alive and relevant **A Laboratory Guide to the Mammalian Embryo** David K. Gardner,Michelle Lane,Andrew J. Watson,2004-01-08 This book pulls together the full range of cell culture biochemical microscopic and genetic techniques to study the early mammalian embryo Until now there has never been such a comprehensive compendium though there have been more focused books of protocol such as Manipulating the Mouse Embryo from Cold Spring Harbor This book is intended to appeal to all constituencies from basic experimental science to clinical and animal science applications **University of Michigan Official Publication** ,1949 **General Register** University of Michigan,1950 Announcements for the following year included in some vols **The Antievolution Pamphlets of Harry Rimmer** Edward B. Davis,2021-10-17 Originally published in 1995 The Antievolution Pamphlets of Harry Rimmer is the sixth volume in the series Creationism in Twentieth Century America The volume brings together original sources from the prominent evangelist and pastor Harry Rimmer The consortium of pamphlets in this volume detail Rimmer s antievolutionist sentiments a notion which characterized his early writings The pamphlets detail Rimmer s rhetoric on evolution and science from the early part of the 20th century as he travelled across America to disseminate his writings The works in this volume address Rimmer s polemic on the danger posed by modern science and the consequential disassociation with religion While Rimmer did not discount science itself he argued for what he termed true science claiming that modern science was based only in scientific opinion and not fact As a self proclaimed scientist these writings take a unique view of the relationship between religion and science from this period

through Rimmer's dual nature as both scientist and pastor. This volume will be of great interest to historians of natural history, science, and religion. **Contributions to Embryology** Carnegie Institution of Washington, 1927 **Principles of Development and Evolution** Mr. Rohit Manglik, 2024-01-24. Examines genetic control of development, morphogenesis, and evolutionary mechanisms driving diversity of life. **Manual of Embryo Selection in Human Assisted Reproduction** Catherine Racowsky, Jacques Cohen, Nicholas Macklon, 2023-01-26. Selecting the best embryo to transfer to the uterus is key to successful in vitro fertilization (IVF). A huge amount of research has been devoted to this topic, and there are numerous methods used, from simple morphological assessment to molecular biological techniques to assess the genome and metabolism of the newly fertilized embryo. For many of these techniques, an adequate evidence base is lacking, and expert opinion is valuable. Clinical imperatives require ranking all embryos in a cohort according to their viability, thereby enabling the selection of the best embryo to optimize live birth outcome, a key indicator used to measure and rate IVF Clinics worldwide. This clear and informative manual will provide embryologists and clinicians with an overview of the tools now available to assist in embryo selection, as well as evidence for their efficacy and safety, and the broader considerations that must underlie these important clinical decisions.
