Accounting for Merchandising Operations

ANSWERS TO QUESTIONS

- Disagree. The steps in the accounting cycle are the same for both a merchandising company and a service company.
 - The measurement of income is conceptually the same. In both types of companies, net income (or loss) results from the matching of expenses with revenues.
- The normal operating cycle for a merchandising company is likely to be longer than in a service company because inventory must first be purchased and sold, and then the receivables must be collected.

FOB destination means that the goods are placed free on board to the buyer's place of business. Thus, the seller pays the freight and debits Freight-out.
- Credit terms of 2/10, n/30 mean that a 2% cash discount may be taken if payment is made within 10 days of the invoice date; otherwise, the invoice price, less any returns, is due 30 days from the invoice date.
