HP X1000 G2 Network Storage Systems are the fast and easy way to add Windows-powered shared storage to your IT environment. They're versatile unified storage, so you get more for your money since it can be a file server, an iSCSI target for application/virtual environment storage, or both. You'll spend less time and effort on maintenance and management once you consolidate to a centralized shared storage system, and industry standards will protect your investment by providing compatibility with your network and applications. The operating system is pre-installed and comes with HP X1000 Automated Storage Manager, so you'll be up and running in minutes.
