STEM Education: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources, 2014-12-31 This reference brings together an impressive array of research on the development of Science Technology Engineering and Mathematics curricula at all educational levels Provided by publisher **The Understanding by Design Guide to Advanced Concepts in Creating and Reviewing Units** Grant P. Wiggins, Jay McTighe, 2012 This volume features a set of hands on modules containing worksheets models and self assessments that are essential for building more polished and powerful units *The World of Science Education* Femi S. Otulaja, Meshach B. Ogunniyi, 2017-09-12 Each volume in the 7 volume series The World of Science Education reviews research in a key region of the world These regions include North America South and Latin America Asia Australia and New Zealand Europe and Israel North Africa and the Middle East and Sub Saharan Africa The focus of this Handbook is on research in science education in mostly former British colonies in Sub Saharan Africa and the scholarship that most closely support this program The reviews of the research situate what has been accomplished within a given field in Sub Saharan Africa rather than an international context The purpose therefore is to articulate and exhibit regional networks and trends that produced specific forms of science education

The thrust lies in identifying the roots of research programs and sketching trajectories focusing the changing face of problems and solutions within regional contexts The approach allows readers to review what has been done and accomplished what is missing and what might be done next

Large-Scale Studies in Mathematics Education James A. Middleton, Jinfa Cai, Stephen Hwang, 2015-05-05 In recent years funding agencies like the Institute of Educational Sciences and the National Science Foundation have increasingly emphasized large scale studies with experimental and quasi experimental designs looking for objective truths Educational researchers have recently begun to use large scale studies to understand what really works from developing interventions to validation studies of the intervention and then to efficacy studies and the final scale up for large implementation of an intervention Moreover modeling student learning developmentally taking into account cohort factors issues of socioeconomics local political context and the presence or absence of interventions requires the use of large data sets wherein these variables can be sampled adequately and inferences made Inroads in quantitative methods have been made in the psychometric and sociometric literatures but these methods are not yet common knowledge in the mathematics education community In fact currently there is no volume devoted to discussion of issues related to large scale studies and to report findings from them This volume is unique as it directly discusses methodological issue in large scale studies and reports empirical data from large scale studies

Teacher Proof Tom Bennett, 2013-07-04 Tom Bennett is the voice of the modern teacher Stephen Drew Senior Vice Principal Passmores Academy UK featured on Channel 4's *Educating Essex* Do the findings from educational science ever really improve the day to day practice of classroom teachers Education is awash with theories about how pupils best learn and teachers best teach most often propped up with the inevitable research that proves the case in point But what can teachers do to find the proof within the pudding and how can this actually help them on wet Wednesday afternoon Drawing from a wide range of recent and popular education theories and strategies Tom Bennett highlights how much of what we think we know in schools hasn't been proven in any meaningful sense at all He inspires teachers to decide for themselves what good and bad education really is empowering them as professionals and raising their confidence in the classroom and the staffroom alike Readers are encouraged to question and reflect on issues such as the most common ideas in modern education and where these ideas were born the crisis in research right now how research is commissioned and used by the people who make policy in the UK and beyond the provenance of education research who instigates it who writes it and how to spot when a claim is based on evidence and when it isn't the different way that data can be analysed what happens to the research conclusions once they escape the laboratory Controversial erudite and yet unremittingly entertaining Tom includes practical suggestions for the classroom throughout This book will be

[Start Seeing and Serving Underserved Gifted Students](#)

Jennifer Ritchotte, Chin-Wen Lee, Amy Graefe, 2020-10-21 2020 TAGT Legacy Book Award for Educators Winner. Flexible tools help teachers see, understand, teach, challenge, and advocate for underserved gifted students. The underrepresentation of students from historically marginalized populations including English language learners, twice exceptional students, culturally and linguistically diverse students, and economically disadvantaged students in our gifted programs and services continues to be a critical issue in education. The importance of a caring and committed teacher who sees and supports the potential in all learners and who respects linguistic diversity and students' cultural identity cannot be overstated; yet teachers need the knowledge and training to do so. This reader friendly guide meets that need, promoting equity in gifted education by providing teachers with a variety of flexible tools to nurture the academic and affective growth of their gifted students from traditionally underserved populations. Over fifty strategies are outlined within five chapters addressing how teachers can see, understand, teach, challenge, and advocate for their underserved gifted learners in all content areas. The authors share numerous student quotes, teacher anecdotes, and spotlights on successful school efforts. Digital downloads include all forms from the book and a PDF presentation. A free PLC Book Study Guide for use in professional development is also available. *Rethinking Field Experiences in Preservice Teacher Preparation* Etta R. Hollins, 2015-03-12 The focus of this book is the centrality of clinical experiences in preparing teachers to work with students from diverse cultural, economic, and experiential backgrounds. Organized around three themes: learning, teaching through the approximation, and representation of practice, learning, teaching, situated in context, and assessing and improving teacher

preparation Rethinking Field Experiences in Preservice Teacher Preparation provides detailed descriptions of theoretically grounded research based practices in programs that prepare preservice teachers to contextualize teaching practices in ways that result in a positive impact on learning for traditionally underserved students These practices serve current demands for teacher accountability for student learning outcomes and model good practice for engaging teacher educators in meaningful productive dialogue and analysis geared to developing local programs characterized by coherence continuity and consistency
