 Silvia Salcuni,2015-05-13 Attachment theory assessment and research offers a broad far reaching view of human functioning
 and it can enrich a psychologist s understanding of subjects and their relational adjustment both in clinical and non clinical
 settings Ongoing research in attachment has led to a number of individual treatments and prevention and intervention
 programs The assessment of an individual s attachment organization can play a crucial role in explaining and previewing the
 unfolding treatment the relational adjustments or concerns and the psychological well being We hope to receive empirical
 papers that give evidence for the usefulness of attachment assessment in both clinical e g patients with Eating Disorder or
 Axis II psychotherapy patients or not clinical population e g Adoptive and or foster families or couples Mother infant
 assessment in prevention field These papers should include methodological issues and information about the participants the
 methods used to assess attachment the process of scorer training and the availability of the manual used to obtain inter
 scorer reliability Case studies may be of interest to the extent that they demonstrate the value of a systematic approach to
 attachment material A range of theoretical perspectives is welcome as well presentation of new emergent tools on
 attachment Because Frontiers in Psychology is an international journal each empirical paper should comment on the
 international implications of the findings and discuss its cross cultural use Such comments may include for example its
 linguistic specificity its robustness in translation and the cross cultural generalizability of the constructs and behaviors of the
 measure and its usual correlates Cross cultural generalizability is not however a requirement *CDS & CDS OTA 14 Years*
