JE Gale

Manual Ahu Breakdown:

Manual of Clinical Microbiology Albert Balows, American Society for Microbiology, 1991 First published in 1970 previous edition in 1985 MCM5 is enlarged and restructured to keep pace with new developments and technology Users must have knowledge of the fundamentals of microbiology and possess basic laboratory skills Operational and organizational chapters address topics ranging from collecting and managing clinical specimens to selecting the best methodological approach for determining strain identity Subsequent chapters deal with specific microorganisms as etiologic agents and with the clinical microbiologic laboratory in various treatment and research functions Member price 64 Annotation copyrighted by Book News Inc Portland OR

Manual of the Flowering Plants of Hawaii Warren Lambert Wagner, Derral R. Herbst, S. H. Sohmer, 1990 The manual of the flowering plants of Hawaii is the first complete compendium of the flowering plants of the Hawaiian Archipelago since Hillebrand's classic Flora of the Hawaiian Islands published a century ago The Hawaiian Archipelago the most isolated major island group in the world has long been known for the remarkable diversity of its ecological environments and for the high level of endemism in its fauna and flora From approximately 280 successful flowering plant colonists at least 956 species of flowering plants have evolved about 89 percent of which are endemic The Hawaiian flora is so distinctive that it is assigned to its own floristic region by most phytogeographers Authors Wagner Herbst and Sohmer and more than fifty collaborating specialists provide keys to and descriptions of the 146 families 649 genera and 1 817 species of native and naturalized plants arranged alphabetically within the dicots and monocots Each species is provided with its accepted scientific name Hawaiian and English common names nomenclatural and taxonomic synonyms chromosome numbers if available and geographical and ecological ranges as well as notes on taxonomic problems and citation of relevant literature Ethnobotanical information is also given for many species Two hundred forty full page plates illustrate more than half of the species and nearly all genera An index literature cited section and voucher information for the plants illustrated are included The authors have also provided chapters on the project history and methods of preparation of the treatments and on the geology climate and vegetation of the Hawaiian Archipelago They have evaluated available information concerning endangered native species and have compiled an accurate census of such plants For many of the genera the treatments presented here include changes and details usually given in revisions The reevaluations have resulted in substantial changes in the taxonomy of many genera of Hawaiian plants By taking this approach the authors have provided the foundation and hypotheses for a new era in the systematic evolutionary and biogeographical study of this fascinating flora Dust jacket

Manual of Clinical Microbiology Edwin H. Lennette, American Society for Microbiology, 1980

HVAC/R Terminology: A Quick Reference Guide Richard Wirz, 2009-04-01 This one of a kind HVAC R technical reference guide incorporates all the HVAC R technical terms used in the industry today and is an indispensable resource for professionals dealing with electricity controls refrigeration cycle heating psychometrics boilers heat pumps heat transfer
