IJER Vol 25-N3 International Journal of Educational Reform, 2016-12-20. The mission of the International Journal of Educational Reform (IJER) is to keep readers up to date with worldwide developments in education reform by providing scholarly information and practical analysis from recognized international authorities. As the only peer reviewed scholarly publication that combines authors' voices without regard for the political affiliations, perspectives or research methodologies, IJER provides readers with a balanced view of all sides of the political and educational mainstream. To this end, IJER includes but is not limited to inquiry based and opinion pieces on developments in such areas as policy administration, curriculum, instruction, law and research. IJER should thus be of interest to professional educators with decision making roles and policymakers at all levels, since it provides a broad based conversation between and among policymakers, practitioners and academicians about reform goals, objectives and methods for success throughout the world. Readers can call on IJER to learn from an international group of reform implementers by discovering what they can do that has actually worked. IJER can also help readers to understand the pitfalls of current reforms in order to avoid making similar mistakes. Finally, it is the mission of IJER to help readers to learn about key issues in school reform from movers and shakers.

Book to Mathematics BRONSHTEIN,2012-12-06 TO THE FIRST RUSSIAN EDITION It was a very difficult task to write a guide book of a small size designed to contain the fundamental knowledge of mathematics which is most necessary to engineers and students of higher technical schools In our tendency to the compactness and brevity of the exposition we attempted however to produce a guide book which would be easy to understand convenient to use and as accurate as possible as much as it is required in engineering It should be pointed out that this book is neither a handbook nor a compendium but a guide book Therefore it is not written as systematically as a handbook should be written Hence the reader should not be surprised to find for example L'Hopital's rule in the section devoted to computation of limits which is a part of the chapter Introduction to the analysis placed before the concept of the derivative or information about the Gamma function in the chapter Algebra just after the concept of the factorial There are many such imperfections in the book Thus a reader who wants to acquire certain information is advised to use not only the table of contents but also the alphabetical index inserted at the end of the book If a problem mentioned in the text is explained in detail in another place of the book then the corresponding page is indicated in a footnote Queensland Targeting Maths: Teaching guide Garda Turner, Robyn Hurley,2004
