Cognitive Neuroscience Editor's Pick 2021 Lutz Jäncke, 2021-08-10 Handbook of Educational Psychology Lyn Corno, Eric M. Anderman, 2015-07-06 The third edition of the Handbook of Educational Psychology is sponsored by Division 15 of the American Psychological Association. In this volume, thirty chapters address new developments in theory and research methods while honoring the legacy of the field's past. A diverse group of recognized scholars within and outside the U.S. provide integrative reviews and critical syntheses of developments in the substantive areas of psychological inquiry in education: functional processes for learning; learner readiness and development; building knowledge and subject matter expertise; and the learning and task environment. New chapters in this edition cover topics such as learning sciences research; latent variable models; data analytics; neuropsychology; relations between emotion, motivation, and volition; EMOVO scientific literacy; sociocultural perspectives on learning; dialogic instruction and networked learning. Expanded treatment has been given to relevant individual differences, underlying processes, and new research on subject matter acquisition. The Handbook of Educational Psychology, Third Edition, provides an indispensable reference volume for scholars in education and the learning sciences, broadly conceived, as well as for teacher educators, practicing teachers, policy makers, and the academic libraries serving these audiences. It is also appropriate for graduate-level courses in educational psychology, human learning, and motivation. The learning sciences and psychological research methods in education and psychology On My Own Xueli Wang, 2021-02-18 2020 ASHE Council for the Advancement of Higher Education Programs CAHEP Barbara Townsend Lecture Award 2021 Transfer Champion Catalyst Award from the National Institute for the Study of Transfer Students NISTS 2021 Outstanding Publication Award AERA Division J Publication and Research On My Own The Challenge and Promise of Building Equitable STEM Transfer Pathways is the first book of its kind to provide a detailed on-the-ground examination of the difficult paths, curricular, interpersonal, and institutional that students must chart through community college. The book follows 1,670 two-year college students over four years as they begin STEM programs in the Midwest and documents their educational and life experiences as they moved toward or away from the prospect of transfer to a four-year institution. Their stories reveal that they were on their own, left to navigate the pathways to transfer without meaningful institutional support. The students pursued one of four pathways or momentum trajectories: linear upward, detoured, deferred, or taking a break. The preexisting and lasting disparities in their access to education and financial resources, their experiences with teaching and advising, and the conundrum between support from and for family, among others, propelled them onto different trajectories in their quest for transfer. As this book makes painfully clear, the current state of transfer acts as a mechanism that perpetuates and worsens inequities in educational outcomes. As Xueli Wang argues, to cultivate an equitable STEM transfer pathway, culturally relevant and responsive supports that are accessible, welcoming, and validating must be put in place at the institutional level and appeal to the talent, motivation, and unique needs of historically marginalized students. In doing so,

postsecondary institutions will be better positioned to fulfill their promise as an equitable pathway to bachelor's degrees and beyond
