

The background is a light blue gradient. On the right side, a hand in a white lab coat sleeve holds a silver stethoscope. Scattered across the background are several hexagonal icons: a heart with an ECG line, a plus sign, a medical van with a cross, a smartphone with a plus sign, a microscope, a network diagram with a central node and five peripheral nodes, a pill, and a stethoscope. The word "DERMATOLOGY" is written in large, bold, dark blue capital letters across the middle of the image.

The MRCGP Study Book T. A. I. Bouchier Hayes,John Fry,Eric Gambrell,Alistair Moulds,K. Young,2012-12-06 The Membership examination of the Royal College of General Practitioners has evolved and matured as a seal and a test on completion of vocational training More than 1000 candidates are taking the examination each year and an increasing majority are trainees who have completed their three year training period The whole concept and philosophy of the MRCGP has been questioned by critical cynics who refuse to accept general practice as a field of medical practice worthy of recognition as a specialty with its own core of know ledge skills and expertise and with its own special epidemiology pathology clinical presentations and management These cynical critics are being answered by the growth of the examination and its recognition within the profession as an important and necessary goal to be achieved The MRCGP exam has arrived it is here to stay and it will continue to grow and evolve The exam is no easy

obstacle to negotiate It has a regular failure rate of 1 in 3 and it requires special preparation and study of its examinees if they are to understand its aims contents and methods It must not be assumed that even the brightest trainee can walk off the street enter the examination hall and be confident of passing It requires a few months of careful and guided preparation
