Getting to Grips with BIM James Harty,Tahar Kouider,Graham Paterson,2015-12-14 With the UK government s 2016 BIM threshold approaching support for small organisations on interpreting filtering and applying BIM protocols and standards is urgently required Many small UK construction industry supply chain firms are uncertain about what Level 2 BIM involves and are unsure about taking first steps towards having BIM capability As digitisation increasingly impacts on work practices Getting to Grips with BIM offers an insight into an industry in change supplemented by practical guidance on managing the transition towards more widespread and integrated use of digital tools to manage the design construction and whole life use of buildings

Data-Driven Innovation in the Creative Industries Melissa Terras,Vikki Jones,Nicola Osborne,Chris Speed,2024-04-17 The creative industries the place where art business and technology meet in economic activity have been hugely affected by the relatively recent digitalisation and often monetisation of work home relationships and leisure Such trends were accelerated by the global COVID 19 pandemic This edited collection examines how the creative industries can be supported to make best use of opportunities in digital technology and data driven innovation Since digital markets and platforms are now essential for revenue generation and audience engagement there is a vital need for improved data and digital skills in the creative and cultural sectors Taking a necessarily global perspective this book explores the challenges and opportunities of data driven approaches to creativity in different contexts across the arts cultural and heritage sectors Chapters reach beyond the platforms and approaches provided by the technology sector to delve into the collaborative work that supports innovation around the interdisciplinary and cross sectoral issues that emerge where data infrastructures and approaches meet creativity A novel intervention that

uniquely centres the role of data in the theory and practice of creative industries innovation this book is valuable reading for those researching and studying the creative economy as well for those who drive investment for the creative industries in a digitalised society The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 International license *An Introduction to Water Supply, Unwatering and Drainage Systems for Hydroelectric Power Plants* J. Handbook Factory Planning and Design Hans-Peter Wiendahl, Jürgen Reichardt, Peter Nyhuis, 2015-04-20 This handbook introduces a methodical approach and pragmatic concept for the planning and design of changeable factories that act in strategic alliances to supply the ever changing needs of the global market In the first part the change drivers of manufacturing enterprises and the resulting new challenges are considered in detail with focus on an appropriate change potential The second part concerns the design of the production facilities and systems on the factory levels work place section building and site under functional organisational architectural and strategic aspects keeping in mind the environmental health and safety aspects including corporate social responsibility The third part is dedicated to the planning and design method that is based on a synergetic interaction of process and space The accompanying project management of the planning and construction phase and the facility management for the effective utilization of the built premises close the book The Authors Prof em Dr Ing Dr mult h c Hans Peter Wiendahl has been director for 23 years of the Institute of Factory planning and Logistics at the Leibniz University of Hannover in Germany Prof Dipl Ing Architekt BDA Jürgen Reichardt is Professor at the Muenster school of architecture and partner of RMA Reichardt Maas Associate Architects in Essen Germany Prof Dr Ing habil Peter Nyhuis is Managing Director of the Institute of Factory Planning and Logistics at the Leibniz University of Hannover in Germany Shape Grammar and Space Syntax Approach in Contextual Design Neeta Lambe, 2024-02-06 The book is an attempt to present a logical approach to contextual design With a lot of buzz around sustainability architects analyze contexts in detail to propose sustainable designs Hence the contextual design approach is gaining importance in architectural practice Architects and designers are always inclined to adopt an intuitive approach to design in historical contexts or surroundings with peculiar characteristics There is no specific methodical approach to design in such contexts apart from the ability to identify cues from the surrounding through experience This book presents a sequential framework wherein one can analyze synthesize and generate design genotypes based on the inbuilt spatial grammar of the context The shape grammar concept as a generative tool is presented to identify the spatial construct s grammar which acts as a cue for design genotypes Space syntax is explored as an analysis tool to evaluate the sympathetic spatial fitness of generated design genotypes The book establishes that the framework is logical in its methodical approach

and would generate design genotypes which would help architects and designers have design interventions in in fill development to achieve congruence with the surrounding environment
