learning analytics and demonstrates how they support students at institutions of higher education by offering personalized and adaptive support of their learning journey. It focuses on four major areas of discussion: Theoretical perspectives linking learning analytics and study success; Technological innovations for supporting student learning; Issues and challenges for implementing learning analytics at higher education institutions; Case studies showcasing successfully implemented learning analytics strategies at higher education institutions. Utilizing Learning Analytics to Support Study Success ably exemplifies how educational data and innovative digital technologies contribute to successful learning and teaching scenarios and provides critical insight to researchers, graduate students, teachers, and administrators in the general areas of education, educational psychology, academic and organizational development, and instructional technology.

International Handbook of Middle Level Education Theory, Research, and Policy David C. Virtue, 2019-08-30. The *International Handbook of Middle Level Education Theory, Research, and Policy* is a landmark resource for researchers, graduate students, policy makers, and practitioners who work in middle level education and associated fields of study. The volume provides an overview of the current state of middle level education theory, research, and policy; offers analysis and critique of the extant literature in the field; and maps new directions for research and theory development in middle level education. The handbook meets a pressing need in the field for a resource that is comprehensive in its treatment of middle level research and international in scope. Chapter authors provide rationales for middle level education research and definitions of the field; discuss philosophical approaches and underpinnings for middle level education research; describe and critique frameworks for quality in middle level education; review research about young adolescent learners; middle level school programming and educator preparation; and analyze public policies affecting middle level education at national, regional, and local levels.

Literature Reviews in Support of the Middle Level Education Research Agenda Steven B. Mertens, Micki M. Caskey, 2018-04-01. In 2015-16, the Middle Level Education Research Special Interest Group (MLER SIG), an affiliate of the American Educational Research Association, undertook a collaborative project: the development of a new middle grades education research agenda. The purpose of the MLER SIG Research Agenda (Mertens et al., 2016) was to develop a set of questions that would guide the direction of middle grades education research. Ideally, this Research Agenda would serve to prompt discourse and generate research projects that could contribute to the middle grades knowledge base. Members of the MLER SIG identified eight research areas: a) young adolescent development, b) cultural responsiveness, c) special populations, d) educator development, e) curriculum, f) social and emotional learning, g) digital technologies, and h) school structures. This volume contains the extensive literature reviews and subsequent research questions for each of the research topics.
