Living Things and the Environment (Global Reading and Study)

1. Use Target Reading Skills: Practice reading questions and answers carefully.

How are scientists using data to understand life?

Answer: An organism's abilities to eat, move, collect, and other things it needs from its environment.

Detail: Each organism needs life in a specific type of environment, called its habitat.

Detail: Organisms live in different habitats because they have different requirements for survival.

Detail: They also may compete among habitats.

Studying Populations (Global Reading and Study)

Use Target Reading Skills: Practice reading questions and answers carefully.

How do you determine population size? (How do scientists determine population size and other characteristics?)

Detail: Observations, sampling, and mark-and-recapture studies. What causes populations to change in size?

Detail: Factors include birth, death, immigration, and emigration.

What are limiting factors? (What are factors that can limit population growth if they are unfavorable for the organisms in the population? (What can cause growth, and another condition can be limiting factors?)

Survivors: Living Things (Global Reading and Study)

Use Target Reading Skills: Practice reading questions and answers carefully.

1. Organisms interact in different ways. What does it mean?

2. Organisms are adapted to their own environment.

3. Organisms have factors, which are their own.

4. Organisms compete for resources. Some organisms eat others, and this affects the size of populations.

5. Some organisms live together in symbiotic relationships, of which there is mutualism (both benefit).

6. Symbiotic relationships, the other is not helped or harmed, and parasitism (one benefits, the other is harmed).
