Volume 2* Paulo Romero Martins Maciel,2023-03-06 This textbook intends to be a comprehensive and substantially self
contained two volume book covering performance reliability and availability evaluation subjects The volumes focus on
computing systems although the methods may also be applied to other systems The first volume covers Chapter 1 to Chapter
14 whose subtitle is Performance Modeling and Background The second volume encompasses Chapter 15 to Chapter 25 and
has the subtitle Reliability and Availability Modeling Measuring and Workload and Lifetime Data Analysis This text is helpful
for computer performance professionals for supporting planning design configuring and tuning the performance reliability
and availability of computing systems Such professionals may use these volumes to get acquainted with specific subjects by
looking at the particular chapters Many examples in the textbook on computing systems will help them understand the
concepts covered in each chapter The text may also be helpful for the instructor who teaches performance reliability and
availability evaluation subjects Many possible threads could be configured according to the interest of the audience and the
duration of the course Chapter 1 presents a good number of possible courses programs that could be organized using this
text Volume II is composed of the last two parts Part III examines reliability and availability modeling by covering a set of
fundamental notions definitions redundancy procedures and modeling methods such as Reliability Block Diagrams RBD and
Fault Trees FT with the respective evaluation methods adopts Markov chains Stochastic Petri nets and even hierarchical and
heterogeneous modeling to represent more complex systems Part IV discusses performance measurements and reliability
data analysis It first depicts some basic measuring mechanisms applied in computer systems then discusses workload
generation After we examine failure monitoring and fault injection and finally we discuss a set of techniques for reliability
and maintainability data analysis ICEL2012- 7th International Conference on E-Learning Paul Lam,2011
