**Marketing and Supply Chain Management** Dimitris Folinas, Thomas Fotiadis, 2017-09-13 Organizations are now recognizing the importance of demand supply integration to their growth and success. While marketing and supply chain management are an essential part of any business qualification, it is becoming increasingly essential to understand the need for integration between synergize marketing and SCM. Marketing and Supply Chain Management is among the first to synergize these two disciplines. Its holistic approach provides students with a macro-level understanding of these functions and their symbiotic relationship to one another and demonstrates how both can be managed synergistically to the benefit of the organization. This bridge-building textbook is ideal for students of marketing, logistics, supply chain management, or procurement who want to understand the machinations of business at a macro level.

**Research Methodologies in Supply Chain Management** Herbert Kotzab, Stefan Seuring, Martin Müller, Gerald Reiner, 2005-05-17 For research in all subjects and among different philosophical paradigms, research methodologies form one of the key issues to rely on. This volume brings a series of papers together which present different research methodologies as applied in supply chain management. This comprises review-oriented papers that look at what kind of methodologies have been applied, as well as methodological papers discussing new developments needed to successfully conduct research in supply chain management. The third group is made up of applications of the respective methodologies which serve as examples on how the different methodological approaches can be applied. All papers have undergone a review process to ensure their quality. Therefore, we hope that this book will serve as a valid source for current and future researchers in the field. While the workshop on Research Methodologies in Supply Chain Management took place at the Supply Chain Management Center Carl von Ossietzky University in Oldenburg, Germany, it is based on a collaboration with the Supply Chain Management Group of the Department of Operations Management at the Copenhagen Business School and the Department of Production Management at the Vienna University of Economics and Business Administration. We would like to thank all those who contributed to the workshop and this book.
