Anand, Shailaja Fennell, Flavio Comim, 2020-12-16 Ever since Jim O Neill at Goldman Sachs coined the term BRICS in 2001 there have been many different assessments of these major emerging economies with some even proclaiming that the promise of the BRICS comprising Brazil Russia India China and South Africa is over However the so called arranged marriage still seems to be working well with the club having become a formal international forum with summit declarations ministerial meetings and numerous BRICS wide fora Is this euphoria misplaced Is there a BRICS model of economic and human development Are inequalities increasing and is this the denouncement of the economic successes Are geo political tensions rising between these nations During the post COVID 19 situation the importance of bilateral and multilateral co operation mechanisms and institutions is becoming clear This book focuses on one such emerging co operation mechanism of BRICS but also more widely on those five countries and other similar economies As a global depression looms large global economic recovery depends on the performance of not only its largest economies but also many other important and significant economies within the so called G20 group Even prior to the COVID 19 outbreak multilateral institutions have been under considerable strain as with the relationship between the United States of America and China and risks to global economic recovery appear very real This book brings together multi disciplinary perspectives from over sixty scholars and it presents a comprehensive and deep dive into the BRICS and emerging economies and into an understanding the political economic and social contexts that can help in designing approaches for recovery and regaining the last momentum in the journey towards the Sustainable Development Goals      The Dala Law Inger Larsson, 2024-11-15 The Dala Law is known

The Political State of Great Britain ,1722

**The Archaeology of Slavery in Early Medieval Northern Europe** Felix Biermann, Marek Jankowiak, 2021-11-18 This volume is the first comprehensive study of the material imprint of slavery in early medieval Europe While written sources attest to the ubiquity of slavery and slave trade in early medieval British Isles Scandinavia and Slavic lands it is still difficult to find material traces of this reality other than the hundreds of thousands of Islamic coins paid in exchange for the northern European slaves This volume offers the first structured reflection on how to bridge this gap It reviews the types of material evidence that can be associated with the institution of slavery and the slave trade in early medieval northern Europe from individual objects such as e g shackles to more comprehensive landscape approaches The book is divided into four sections The first presents the analytical tools developed in Africa and prehistoric Europe to identify and describe social phenomena associated with slavery and the slave trade The following three section review the three main cultural zones of early medieval northern Europe the British Isles Scandinavia and Slavic central Europe The contributions offer methodological reflections on the concept of the archaeology of slavery They emphasize that the material record by its nature admits multiple interpretations More broadly

this book comes at a time when the history of slavery is being integrated into academic syllabi in most western countries The collection of studies contributes to a more nuanced perspective on this important and controversial topic This volume appeals to multiple audiences interested in comparative and global studies of slavery and will constitute the point of reference for future debates     Exploring Contemporary Classification Practices Jack Andersen,Joacim Hansson,2025-07-15 The

contributions in Exploring Contemporary Classification Practices analyse various aspects of classification and their importance to contemporary debates surrounding cultural heritage and information access Specific focus is on systems of classification media technologies and cultural institutions such as libraries archives and museums and how they respond to challenges including classificatory bias truth neutrality institutional tradition and technological innovation Raising awareness of classification practices in modern culture serves to emphasize how sorting things into categories is both an everyday accomplishment and a highly cultural and political activity with consequences for those who are classified and for those who classify Throughout this book classification is defined as the practice and activity of systematically ordering and categorizing entities to bring structure and understanding to diverse contexts This book addresses several timely issues both in terms of theoretical advancement and empirical diversity The scholarly discussion on the classification and organization of knowledge has developed with digital technologies from a bibliographic paradigm into something much wider as the need for metadata and classification has become critical for usability and legitimacy This development has also led research on classification and knowledge organization to confront a new post humanist reality with not only emerging varieties of information currents in society but also the development of new theoretical and methodological strands such as post colonial and intersectional perspectives and digital humanities methodologies In doing so this book seeks to address critical questions for the archives library and museum sectors concerning the organization of information Exploring Contemporary Classification Practices will therefore be of interest to academics researchers and practitioners with interests in library and information science archives cultural heritage and digital heritage     **Analysis in Banach Spaces** Tuomas Hytönen,Jan van Neerven,Mark Veraar,Lutz

Weis,2023-12-07 This third volume of Analysis in Banach Spaces offers a systematic treatment of Banach space valued singular integrals Fourier transforms and function spaces It further develops and ramifies the theory of functional calculus from Volume II and describes applications of these new notions and tools to the problem of maximal regularity of evolution equations The exposition provides a unified treatment of a large body of results much of which has previously only been available in the form of research papers Some of the more classical topics are presented in a novel way using modern techniques amenable to a vector valued treatment Thanks to its accessible style with complete and detailed proofs this book will be an invaluable reference for researchers interested in functional analysis harmonic analysis and the operator theoretic approach to deterministic and stochastic evolution equations     **Comparative Just War Theory** Luis

Cordeiro-Rodrigues,Danny Singh,2019-10-23 Widespread cross cultural and cross ideological agreement on the justifiable

limits of war has become an increasingly complex yet vital element of global peace and conflict policies Lu s Cordeiro Rodrigues and Danny Singh bring together a truly international cohort of philosophers ethicists political scientists criminologists sociologists and other scholars to address the morality of war from a comparative perspective While conceptions of when to enter war *jus ad bellum* and how to fight war *jus in bello* have been well researched in Western liberal contexts non Western philosophies have been largely excluded from debate This volume seeks to correct that imbalance by addressing concrete examples alongside concepts of Confucian Yi Rightness Ahimsa feminism class struggles Ubuntu anarchism pacifism Buddhism Islam Jihad among others Comparative Just War Theory provides a global conceptual framework to deal with the morality of war in our modern world With fresh insights into how the normative problems that arise from just war can be addressed the book will be a valuable resource for a wide variety of students scholars and policymakers

**The Study of Science and Religion** Carl Reinhold Brakenhielm, 2018-06-06 The main aim of this book is to contribute to the relationship between science and religion This book aims to do constructive theological work out of a particular cultural context The point of departure is contemporary Swedish religion and worldviews One focus is the process of biologization i e how the worldviews of the general public in Sweden are shaped by biological science Is there a gap between Swedes in general and the perceptions of Swedish clergy The answer is based on sociological studies on science and religion in Sweden and the United States Furthermore the book contains a study of Swedish theologians from Nathan Soderblom to the present Archbishop Antje Jackelen and their shifting understanding of the relation between science and religion The philosophical aspects of this relation are given special consideration What models of the relation inform the contemporary scholarly discussion Are science and religion in conflict separate or in mutual creative interaction Nordic Cooperation Johan Strang, 2015-07-16 The recent crises in global economy and in European integration have caused a considerable revival of interest in the Nordic Welfare Model However less attention has been given to the ways in which the nations that form Scandinavia or Norden are connected through various forms of inter and transnational cooperation With contributions from a team of experts in the field this volume analyses Nordic cooperation in a European perspective and argues that this special form of transnational cooperation has been crucial in the development of the Nordic Welfare Model In addition it also contends that the Nordic model of transnational cooperation is a relevant case study when pondering the present problems of European integration This text will be of key interest to students researchers and policy makers studying the Nordic Model and transnational cooperation and more generally to those interested in European studies Scandinavian studies welfare studies international relations and regional integration
