

## 7. Needless Havoc

AS MAN PROCEEDS toward his announced goal of the conquest of nature, he has written a depressing record of destruction, directed not only against the earth he inhabits but against the life that shares it with him. The history of the recent centuries has its black passages — the slaughter of the buffalo on the western plains, the massacre of the shorebirds by the market gunners, the near-extirmination of the egrets for their plumage. Now, to these and others like them, we are adding a new chapter and a new kind of havoc — the direct killing of birds, mammals, fishes, and indeed practically every form of wildlife by chemical insecticides indiscriminately sprayed on the land.

Under the philosophy that now seems to guide our destinies, nothing must get in the way of the man with the spray gun. The incidental victims of his crusade against insects count as nothing; if robins, pheasants, raccoons, cats, or even livestock happen to inhabit the same bit of earth as the target insects and

The Scientific Sublime Alan G. Gross, 2018-06-01 The sublime evokes our awe our terror and our wonder Applied first in ancient Greece to the heights of literary expression in the 18th century the sublime was extended to nature and to the sciences enterprises that viewed the natural world as a manifestation of God's goodness power and wisdom In *The Scientific Sublime* Alan Gross reveals the modern day sublime in popular science He shows how the great popular scientists of our time Richard Feynman Stephen Hawking Steven Weinberg Brian Greene Lisa Randall Rachel Carson Stephen Jay Gould Steven Pinker Richard Dawkins and E O Wilson evoke the sublime in response to fundamental questions How did the universe begin How did life How did language These authors maintain a tradition initiated by Joseph Addison Edmund Burke Immanuel Kant and Adam Smith towering 18th century figures who adapted the literary sublime first to nature then to science though with one crucial difference religion has been replaced wholly by science In a final chapter Gross explores science's attack on religion an assault that attempts to sweep permanently under the rug two questions science cannot answer What is the meaning of life What is the meaning of the good life

**Ecology** Michael Allaby, 2010 Traces the origin of ecology and explains what it is and how it has progressed over time

*The Origins of Modern Environmental Thought* Joseph Edward De Steiguer, 2006-09-15 *The Origins of Modern Environmental Thought* provides readers with a concise and lively introduction to the seminal thinkers who created the modern environmental movement and inspired activism and policy change Beginning with a brief overview of the works of Thoreau Mill Malthus Leopold and others de Steiguer examines some of the earliest philosophies that underlie the field He then describes major socioeconomic factors in post World War II America that created the milieu in which the modern environmental movement began with the publication of Rachel Carson's *Silent Spring* The following chapters offer summaries and critical reviews of landmark works by scholars who helped shape and define modern environmentalism Among others de Steiguer examines works by Barry Commoner Paul Ehrlich Kenneth Boulding Garrett Hardin Herman Daly and Arne Naess He describes the growth of the environmental movement from 1962 to 1973 and explains a number of factors that led to a decline in environmental interest during the mid 1970s He then reveals changes in environmental awareness in the 1980s and concludes with commentary on the movement through 2004 Updated and revised from *The Age of Environmentalism* this expanded edition includes three new chapters on Stewart Udall Roderick Nash and E F Schumacher as well as a new concluding chapter bibliography and updated material throughout This primer on the history and development of environmental consciousness and the many modern scholars who have shaped the movement will be useful to students in all branches of environmental studies and philosophy as well as biology economics and physics

Earth Days William Dritschilo, 2004 *Earth Days* details the events of the revolution in ecology initiated by the publication of *Silent Spring* from the perspective of someone involved in its events It is a book having to do with ideas and the people who held them *Earth Days* starts with Rachel Carson and the other writers and scientists whose words caught the attention

of the public on Earth Day It tells about the Odum brothers from the corn pone South champions of the ecosystem idea Robert MacArthur the James Dean of ecology and Jared Diamond who tried to be his successor and in the effort set off a war in ecology It tells about Dan Simberloff who rebelled against the science inspired by his own mentors in that war It tells about Paul Ehrlich and David Pimentel for whom no environmental issue was beyond their expertise It also tells about Gene Likens who looked and acted more like an insurance salesman yet found a way through the swirling controversies in his science to put it to good practical use There are of course many others each trying to find their own personal way in the broad important science that is ecology Earth Days details that revolution from the perspective of someone involved in its events It also gives the reader the necessary background to follow the most technical material Difficult material becomes easy lively reading Howard V Cornell University of Delaware Fantastic It kept me up all night I couldn't put it down Nicholas Gotelli University of Vermont It is very lively and fun to read Daniel Simberloff University of Tennessee an excellent and engaging writer appears to be a really major and interesting book David Pimentel Cornell University fantastic job of writing to capture the views of numerous ecologists Gene Likens New York Botanical Garden I learned some things about myself

**Reading Nature** John Seibert Farnsworth, 2025-03-01 Reading Nature highlights the ten books that most influenced the scope and direction of literary natural history in the United States It explores how American nature writing came to focus on the deep observation of wild landscapes and how the genre evolved over 163 years beginning with the publication of Henry David Thoreau's Walden in 1854 The volume also examines Mary Austin's Land of Little Rain 1903 John Burroughs's Ways of Nature 1905 Aldo Leopold's A Sand County Almanac 1949 Rachel Carson's The Sea around Us 1951 Edward Abbey's Desert Solitaire 1968 Annie Dillard's Pilgrim at Tinker Creek 1974 Terry Tempest Williams's Refuge 1991 Robin Wall Kimmerer's Braiding Sweetgrass 2013 and J Drew Lanham's The Home Place 2016 This book features a series of close readings exploring how these authors transformed popular understanding of the natural world

**Effective Conservation Science** Peter M. Kareiva, Michelle Marvier, Brian R. Silliman, 2018 This novel text assembles some of the most intriguing voices in modern conservation biology Collectively they highlight many of the most challenging questions being asked in conservation science today each of which will benefit from new experiments new data and new analyses The book's principal aim is to inspire readers to tackle these uncomfortable issues head on A second goal is to be reflective and consider how the field has reacted to challenges to orthodoxy and to what extent have or can these challenges advance conservation science Furthermore several chapters discuss how to guard against confirmation bias The overall goal is that this book will lead to greater conservation of ecosystems and biodiversity by harnessing the engine of constructive scientific scepticism in service of better results

**Culture of Ecology** Robert E. Babe, Robert Babe, 2006-01-01 There is a fundamental contradiction between economics and ecology Activities that increase well being by economic criteria often erode ecosystem vitality and what preserves and enhances environmental well being is often deemed inefficient to economic demands Regrettably in our

culture we usually accord much greater importance to economic concerns than to ecology. However, given many indicators of continued environmental degradation, escalating rates of species extinctions, global warming, the profusion of toxins in our air, water, and soil, it is increasingly urgent that economics be infused with ecological principles. In *Culture of Ecology*, Robert Babe proposes a move towards more ecologically sound ways of thinking, communicating, and acting, including those usually termed economic. His vision for a sustainable future entails recognizing and compensating for the inherent bias of all modes of communicating, reducing the centrality of money as a medium of communication, re-establishing systems of valuation outside the bounds of commodity exchange, and heightening equality to ease flows of information more in keeping with ecological realities. *Culture of Ecology* marks the beginning in a struggle to prove that given the right approach, economy and ecosystem need not be mutually exclusive.

*Introduction to Ecological Aesthetics* Fanren Zeng, 2019-08-26 This book explores in detail the issues of ecological civilization, development, ecological philosophy, ecological criticism, environmental aesthetics, and the ecological wisdom of traditional Chinese culture related to ecological aesthetics. Drawing on Western philosophy and aesthetics, it proposes and demonstrates a unique aesthetic view of ecological ontology in the field of aesthetics under the direct influence of Marxism, which is based on the modern economic, social, cultural development and the modern values of traditional Chinese culture. This book embodies the innovative interpretation of Chinese traditional culture in the Chinese academic community. The author discusses the philosophical and cultural resources that can be used for reference in Chinese and Western cultural tradition, focusing on traditional Chinese Confucianism, Taoism, Buddhism, and painting art. Western modern ecological philosophy, Heidegger's ontology, ecological aesthetics, and British and American environmental aesthetics. In short, the book comprehensively discusses the author's concept of ecological ontology, aesthetics as an integration and unification of ontology, aesthetics, and ecological aesthetics. This generalized ecological aesthetics explores the relationship between humans and nature, society and itself, guided by the brand new ecological worldview in the post-modern context. It also changes the non-beauty state of human existence and establishes an aesthetic existence state that conforms to ecological laws.

**The Columbia Documentary History of American Women Since 1941** Harriet Sigerman, 2003 From the Hoover vacuum cleaner to the fax machine, from the pill to reproductive rights, from Rosie the Riveter to Martha Stewart and Hillary Rodham Clinton, American women have grappled with a sometimes dizzying rate of social and economic change and continually shifting conceptions of gender. This collection of documents seeks to chronicle the exciting and tumultuous recent history of American women, beginning with the watershed event of World War II and the lasting impact of the war effort on women's social and economic opportunities. Subsequent documents speak to the ideas and changes brought about by the women's movement, the challenges to and defense of reproductive rights, the backlash against feminism in the name of family values, and new visions for women's lives in the twenty-first century.

*An Alternative History of Hyperactivity* Matthew Smith, 2011-07-01 In 1973 San Francisco allergist Ben Feingold created an uproar by

claiming that synthetic food additives triggered hyperactivity then the most commonly diagnosed childhood disorder in the United States He contended that the epidemic should not be treated with drugs such as Ritalin but instead with a food additive free diet Parents and the media considered his treatment the Feingold diet a compelling alternative Physicians however were skeptical and designed dozens of trials to challenge the idea The resulting medical opinion was that the diet did not work and it was rejected Matthew Smith asserts that those scientific conclusions were in fact flawed An Alternative History of Hyperactivity explores the origins of the Feingold diet revealing why it became so popular and the ways in which physicians parents and the public made decisions about whether it was a valid treatment for hyperactivity Arguing that the fate of Feingold s therapy depended more on cultural economic and political factors than on the scientific protocols designed to test it Smith suggests the lessons learned can help resolve medical controversies more effectively

*Remaking Reality* Sara Blair, Joseph B. Entin, Franny Nudelman, 2018-03-15 After World War II U S documentarians engaged in a rigorous rethinking of established documentary practices and histories Responding to the tumultuous transformations of the postwar era the atomic age the civil rights movement the Vietnam War the emergence of the environmental movement immigration and refugee crises student activism the globalization of labor and the financial collapse of 2008 documentary makers increasingly reconceived reality as the site of social conflict and saw their work as instrumental to struggles for justice Examining a wide range of forms and media including sound recording narrative journalism drawing photography film and video this book is a daring interdisciplinary study of documentary culture and practice from 1945 to the present Essays by leading scholars across disciplines collectively explore the activist impulse of documentarians who not only record reality but also challenge their audiences to take part in reality s remaking In addition to the editors the volume s contributors include Michael Mark Cohen Grace Elizabeth Hale Matthew Frye Jacobson Jonathan Kahana Leigh Raiford Rebecca M Schreiber Noah Tsika Laura Wexler and Daniel Worden

*Saving America's Wildlife* Thomas R. Dunlap, 1988 Through an account of evolving ideas about wolves and coyotes Thomas Dunlap shows how American attitudes toward animals have changed

**Fish and Wildlife News** ,2001      **Post-Apocalyptic Environmentalism** Carl Cassegård, Håkan Thörn, 2022-10-21 This book analyses how the environmental movement has developed three overarching narratives that co exist and compete within it The first is the narrative of green progress which has been prominent from the start in environmentalist thought and which is today expressed in the idea of sustainable development and in eco modernism The second is the apocalyptic narrative which urges us to act in order to avert a future catastrophe and which rose to prominence with Rachel Carson and other classics of post war environmentalism and experienced a renaissance with the climate activism of the 2000s The third is the postapocalyptic narrative according to which catastrophe is already an unavoidable fact The centrepiece of the book is its discussion of the postapocalyptic narrative which has become influential in the recent decade especially in the wake of the disillusionment following the failed climate summit in Copenhagen 2009 Climate change resource exhaustion pollution and

species extinction signal that catastrophes have already become realities here and now for an enormous number of people and other lifeforms The book probes the possibilities and limitations of the environmental movement in grappling with these issues and turning them into relevant action

**Integration of Insect-Resistant Genetically Modified Crops within IPM Programs** Jörg Romeis,Anthony M. Shelton,George Kennedy,2008-07-01 Insect pests remain one of the main constraints to food and fiber production worldwide despite farmers deploying a range of techniques to protect their crops Modern pest control is guided by the principles of integrated pest management IPM with pest resistant germplasm being an important part of the foundation Since 1996 when the first genetically modified GM insect resistant maize variety was commercialized in the USA the area planted to insect resistant GM varieties has grown dramatically representing the fastest adoption rate of any agricultural technology in human history The goal of our book is to provide an overview on the role insect resistant GM plants play in different crop systems worldwide We hope that the book will contribute to a more rational debate about the role GM crops can play in IPM for food and fiber production

**The Promethean Illusion** Bob Tostevin,2014-01-10 This book explores two contradictory realities our continuing belief that nature is subject to our willful control and nature s refusal to abide by this belief It investigates particular aspects of modern science and spotlights the impact Newtonian science had upon the Western world It then critically assesses twentieth century developments in science presenting a number of biological and ecological case studies that document the various limitations that the natural world places upon human knowledge The analysis argues against programmatic proposals to control nature via genetic engineering and planet management
