the site of tissue injury Of note viable oligodendrocytes and an intact myelin sheath are indispensable for neuronal health For example it has been shown that oligodendrocytes provide nutritional support to neurons fast axonal transport depends on proper oligodendrocyte function and mice deficient in mature myelin proteins eventually display severe neurodegeneration This Special Issue contains a collection of highly relevant primary research articles as well as review articles focusing on the development physiology and pathology of the oligodendrocyte axon myelin unit

FRP Composites in Civil Engineering -

CICE 2004 R. Seracino,2004-12-15 The range of fibre reinforced polymer FRP applications in new construction and in the retrofitting of existing civil engineering infrastructure is continuing to grow worldwide Furthermore this progress is being matched by advancing research into all aspects of analysis and design The Second International Conference on FRP

Composites in **Structural Engineering, Mechanics and Computation** A. Zingoni,2001-03-16 Following on from the International Conference on Structural Engineering Mechanics and Computation held in Cape Town in April 2001 this book contains the Proceedings in two volumes There are over 170 papers written by Authors from around 40 countries worldwide The contributions include 6 Keynote Papers and 12 Special Invited Papers In line with the aims of the SEMC 2001 International Conference and as may be seen from the List of Contents the papers cover a wide range of topics under a variety of themes There is a healthy balance between papers of a theoretical nature concerned with various aspects of structural mechanics and computational issues and those of a more practical nature addressing issues of design safety and construction As the contributions in these Proceedings show new and more efficient methods of structural analysis and numerical computation are being explored all the time while exciting structural materials such as glass have recently come onto the scene Research interest in the repair and rehabilitation of existing infrastructure continues to grow particularly in Europe and North America while the challenges to protect human life and property against the effects of fire earthquakes and other hazards are being addressed through the development of more appropriate design methods for buildings bridges and other engineering structures
