Kanold,Lee Stiff,2004-01 Artificial Intelligence in Education Elisabeth André,Ryan Baker,Xiangen Hu,Ma. Mercedes T. Rodrigo,Benedict du Boulay,2017-06-22 This book constitutes the refereed proceedings of the 18th International Conference on Artificial Intelligence in Education AIED 2017 held in Wuhan China in June July 2017 The 36 revised full papers presented together with 4 keynotes 37 poster presentations 4 doctoral consortium papers 5 industry papers 4 workshop abstracts and 2 tutorial abstracts were carefully reviewed and selected from 159 submissions The conference provides opportunities for the cross fertilization of approaches techniques and ideas from the many fields that comprise AIED including computer science cognitive and learning sciences education game design psychology sociology linguistics as well as many domain specific areas Mathematics Instructional Practices in Singapore Secondary Schools Berinderjeet Kaur,Yew Hoong Leong,2021-01-06 This book offers a detailed look into the how and what of mathematics instruction in Singapore It presents multiple aspects of mathematics instruction in schools ranging from the unique instructional core practices that promote mastery development of conceptual knowledge through learning experiences nurturing of positive attitudes self regulation of learning and development and use of instructional materials for making connections across mathematical ideas developing mathematical reasoning and developing fluency in applying mathematical knowledge in problem solving The book presents a methodology that is successful in documenting classroom instruction in a comprehensive manner The research findings illuminate instruction methods that are culturally situated robust and proven to impact student learning It demonstrates how a unique data source can be analysed through multiple lenses and provides readers with a rich portrait of how the school mathematics instruction is enacted in Singapore secondary schools

Practices of Projection Gabriel Menotti, Virginia Crisp,2020-02-05 To many the technological aspects of projection often go unnoticed only brought to attention during moments of crisis or malfunction For example when a movie theater projector

falters the audience suddenly looks toward the back of the theater to see a sign of mechanical failure The history of cinema similarly shows that the attention to projection has been most focused when the whole medium is hanging in suspension During Hollywood's economic consolidation in the 30s projection defined the ways that sync sound technologies could be deployed within the medium Most recently the digitization of cinema repeated this process as technology was reworked to facilitate mobility These examples show how projection continually speaks to the rearrangement of media technology Projection therefore needs to be examined as a pivotal element in the future of visual media's technological transition In *Practices of Projection: Histories and Technologies* volume editors Gabriel Menotti and Virginia Crisp address the cultural and technological significance of projection Throughout the volume chapters reiterate that projection cannot and must not be reduced to its cinematic functions alone Borrowing media theorist Siegfried Zielinski's definition Menotti and Crisp refer to projection as the heterogeneous array of artefacts technical systems and particularly visual praxes of experimentation and of culture From this readers can understand the performative character of the moving image and the labor of the different actors involved in the utterance of the film text Projection is not the same everywhere nor equal all the time Its systems are in permanent interaction with environmental circumstances neighboring structures local cultures and social economies Thus the idea of projection as a universal fully autonomous operation cannot hold Each occurrence of projection adds nuance to a wider understanding of film screening technologies

Delve into the emotional tapestry woven by in **Holt Geometry A Practice** .
