Constructing Policy Change Linda A. White, 2017-01-01 In *Constructing Policy Change* Linda A White examines the expansion of early childhood education and care ECEC policies and programs in liberal welfare states including Australia Canada New Zealand the UK and the USA In the first part of the book the author investigates the sources of policy ideas that triggered ECEC changes in various national contexts This is followed by a close analysis of cross national variation in the implementation of ECEC policy in Canada and the USA White argues that

the primary mechanisms for policy change are grounded in policy investment logics as well as cultural logics that is shifts in public sentiments and government beliefs about the value of ECEC policies and programs are rooted in both evidence based arguments and in principled beliefs about the policy A rich nuanced examination of the reasons motivating ECEC policy expansion and adoption in different countries Constructing Policy Change is a corrective to the comparative welfare state literature that focuses on political interest alone *Reading for Our Lives* Maya Payne Smart,2025-04-29 Completely revised and updated Now in paperback An award winning journalist and literacy advocate provides a clear step by step guide to helping your child thrive as a reader and a learner Today s children face intense pressure to meet rising academic standards and prepare for future careers but most fall dangerously short Early struggles with language and literacy often snowball into lasting disadvantages Millions of U S kids don t learn to read well in elementary school driving low adult literacy rates and threatening the nation s economic productivity public health and social equity In *Reading for Our Lives* journalist Maya Payne Smart shows that the literacy crisis starts at home Too many parents expect schools to unlock their child s reading potential unaware that even the best classroom instruction which most don t get can t make up for weak early preparation or inconsistent support outside of school Smart breaks down the latest research to show parents how to do their part to build essential literacy skills She busts the myth that bedtime stories are parents greatest contribution to kids reading development She advocates instead for weaving a range of simple fun free literacy habits and activities into everyday family life and shows you how to do it With optimism and evidence *Reading for Our Lives* delivers a clear call to action and a path forward for families schools and communities to beat the literacy crisis together *Learning Together* Michael J. Kaufman,Sherelyn R. Kaufman,Elizabeth C. Nelson,2015-03-24 This book makes a comprehensive multi disciplinary argument for investing in effective early childhood education programs especially those that develop in children their proven natural capacity to construct knowledge by building meaningful relationships Recent insights in the fields of law policy economics pedagogy and neuroscience demonstrate that these particular programs produce robust educational social and economic benefits for children and for the country The book also provides legal and political strategies for achieving these proven benefits as well as pedagogical strategies for developing the most effective early childhood education programs The book concludes by making visible the wonderful learning that can take place in an early education environment where teachers are afforded the professional judgment to encourage children to construct their own knowledge through indispensable learning relationships **Using Developmentally Appropriate Practices to Teach the Common Core** Lisa S. Goldstein,2015-07-16 *Using Developmentally Appropriate Practices to Teach the Common Core* Grades PreK 3 provides current and prospective primary grade teachers with an understanding of the CCSS ELA and CCSS M that highlights their compatibility with developmentally appropriate practices DAP the instructional approach generally preferred by teachers of young children The book begins by framing the CCSS as a distinct improvement over lengthy lists of academic

content standards and as a carefully conceptualized and DAP friendly set of curriculum guidelines Next the CCSS ELA and CCSS M for Grades K 3 are unpacked analyzed synthesized and cross referenced to key features of DAP Finally several hot topic issues differentiating instruction to meet the needs of all learners ensuring equitable access to the curriculum for English Language Learners addressing assessment and accountability expectations and educating parents and families about the CCSS and DAP are prioritized and examined in depth Using Developmentally Appropriate Practices to Teach the Common Core Grades PreK 3 is a highly useful guide for both pre service and in service early childhood education teachers **The SAGE Encyclopedia of Contemporary Early Childhood Education** Donna Couchenour,J. Kent Chrisman,2016-08-16 The general public often views early childhood education as either simply babysitting or as preparation for later learning Of course both viewpoints are simplistic Deep understanding of child development best educational practices based on development emergent curriculum cultural competence and applications of family systems are necessary for high quality early education Highly effective early childhood education is rare in that it requires collaboration and transitions among a variety of systems for children from birth through eight years of age The SAGE Encyclopedia of Contemporary Early Childhood Education presents in three comprehensive volumes advanced research accurate practical applications of research historical foundations and key facts from the field of contemporary early childhood education Through approximately 425 entries this work includes all areas of child development physical cognitive language social emotional aesthetic as well as comprehensive review of best educational practices with young children effective preparation for early childhood professionals and policy making practices and addresses such questions as How is the field of early childhood education defined What are the roots of this field of study How is the history of early childhood education similar to yet different from the study of public education What are the major influences on understandings of best practices in early childhood education

Saving Congress from Itself James L Buckley,2014-12-09 Saving Congress from Itself proposes a single reform eliminate all federal grants in aid to state and local governments This action would reduce federal spending by over 600 billion a year and have a profound effect on how we govern ourselves The proliferation of federal grants in aid programs is of recent vintage only about 100 such grants existed before Lyndon Johnson took office and now they number more than 1 100 Eliminating grants to the states will result in enormous savings in federal and state administrative costs free states to set their own priorities and improve the design and implementation of programs now subsidized by Washington by eliminating federal regulations that attend the grants In short it will free states and their subdivisions to resume full responsibility for all activities that fall within their competence such as education welfare and highway construction and maintenance And because members of Congress spend major portions of their time creating grants and allocating funds assigned to them think earmarks eliminating grants will enable Congress to devote its time to responsibilities that are uniquely national in character

Tager, 2017-03-27 Challenging the normative paradigm that school readiness is a positive and necessary objective for all young children this book asserts that the concept is a deficit based practice that fosters the continuation of discriminatory classifications Tager draws on findings of a qualitative study to reveal how the neoliberal agenda of school reform based on high stakes testing sorts and labels children as non ready affecting their overall schooling careers Tager reflects critically on the relationship between race and school readiness showing how the resulting exclusionary measures perpetuate the marginalization of low income Black children from an early age Disrupting expected notions of readiness is imperative to ending practices of structural classism and racism in early childhood education Legal Foundations of Education J.C.
