Newton, 2021-11-29 Guided Math Lessons in Kindergarten provides detailed lessons to help you bring guided math groups to life Based on the bestselling Guided Math in Action this practical book offers 16 lessons taught in a round of three concrete pictorial and abstract The lessons are based on the priority standards and cover fluency word problems counting and cardinality and place value Author Dr Nicki Newton shows you the content as well as the practices and processes that should be worked on in the lessons so that students not only learn the content but also how to solve problems reason communicate their thinking model use tools use precise language and see structure and patterns Throughout the book you ll find tools templates and blackline masters so that you can instantly adapt the lesson to your specific needs and use it right away With the easy to follow plans in this book students can more work effectively in small guided math groups and have loads of fun along the way Remember that guided math groups are about doing the math So throughout these lessons you will see students working with manipulatives to make meaning doing mathematical sketches to show what they understand and can make sense of the abstract numbers When students are given the opportunities to make sense of the math in hands on and visual ways then the math begins to make sense to them **MATH - Kindergarten** Kimberley Nash, Warren

Nash, 2005-12-01 Kindergarten Math Getting started teaching your student math for the first time can seem overwhelming for some or a great adventure for others Whatever your perspective this curriculum workbook has all that you need to get your student off to a great start Attractive artwork easy to understand instructions and adequate spacing make this curriculum tailored to your student s beginning abilities The curriculum is interactive with lots of coloring opportunities to delight your student and refresh their attention as they learn the meatier aspects of math Your student will complete two full pages of learning activities per day that integrates several learning skills in each session By working sequentially through the entire curriculum your student will be able to master all of the required math skills for this grade level mandated by state education departments The curriculum begins with a variety of activities such as writing reading counting and coloring skills that are developed while your student learns to recognize and write the numbers 1 20 as well as their names Phonics based short sentences with number words are inserted periodically for your student to practice reading and for you to gain perspective of his or her growing accomplishments Next your student moves on to exercises that include How many matching objects to numbers counting groups of objects and identifying objects in groups After mastering number recognition your student will continue on to learning about number order Number order will help your student with sequencing as well as with what comes before after and in between This leads to being able to discern which number is most or least in a group of numbers as well as if numbers are the same or different Learning about shapes is also an important

part of a student's math experience. Your student will learn to identify shapes by how they are constructed. He or she will learn how to count shapes, sort shapes, and write the words for shapes. And there are plenty of opportunities to color and draw shapes throughout the workbook. Putting numbers and shapes together naturally prepares your student for the next unit of learning involving the telling of time. Your student will learn to recognize and tell time on both standard and digital clocks. The study of time includes minutes, quarter hours, half hours, hours, and learning to identify time before and after a pre-selected time. Finally, your student will learn to recognize and know the value of our American monetary coins. Your student will increase their counting and sorting skills by working with this currency. When your student closes the last page of this curriculum, he or she will be well prepared for the next grade. This curriculum is in a workbook format that your student will consume with pleasure. The many pictures and activities will delight the learning process as well as ease its mastery. Flash cards for daily practice are included for you to cut out and use as needed. This spiral-bound workbook lays flat for ease of use by young students.
