Resources in Education ,1999-04 *Beyond Measure* Vicki Abeles,Grace Rubenstein,2015-10-06 From the director of Race to Nowhere comes a book for parents students and educators on how to revolutionize learning prioritize children s health and re envision success for a lifetime *More Than We Expected* James G. Robinson,2023-11-07 No matter how much I enjoyed parenthood I found myself having to accept its fundamental truth that nothing ever turns out quite as you d expect It was a journey that most parents would hope to avoid a son born with a congenital heart defect a fateful decision to take a family trip abroad and an emergency hospitalization that left them stranded on the other side of the world with no obvious way home Despite these difficult circumstances More Than We Expected is not a tragedy Instead this memoir offers valuable lessons about the privilege of parenthood and the practice of medicine the mysterious ways in which the body forms and grows giving life how we find the faith to live with our decisions even if the consequences are beyond our control and a family s extraordinary capacity when something goes wrong to compensate and heal More Than We Expected is a story of finding strength in the most unexpected places Our children have a special ability to reveal the goodness in the world their eyes a window to a life full of wonder Like them this book is a vivid reminder of what it means to be human a miraculous inexplicable gift however fleeting Handbook of Field Experiments Esther Duflo,Abhijit Banerjee,2017-03-21 Handbook of Field Experiments Volume Two explains how to conduct experimental research presents a catalog of research to date and describes which areas remain to be explored The new volume includes sections on field experiments in education in developing countries how to design social protection programs a section on how to combat poverty and updates on data relating to the impact and determinants of health levels in low income countries Separating itself from circumscribed debates of specialists this volume surpasses the many journal articles and narrowly defined books written by practitioners This ongoing series will be of particular interest to scholars working with experimental methods Users will find results from politics education and more Balances methodological insights with analyses of principal findings and suggestions for further research Appeals broadly to social scientists seeking to develop an expertise in field experiments Written in a language that is accessible to graduate students and non specialist economists **Mobility and Cosmopolitanism** Vered Amit,Pauline Gardiner Barber,2018-04-19 In academic descriptions of cosmopolitanism one particularly important distinction often recurs Specifically scholars have been concerned to distinguish between cosmopolitanism as a set of mundane practices and or competences on the one hand and cosmopolitanism as a cultivated form of consciousness or moral aspiration on the other For anthropologists whose ethnographic studies reveal many different expressions of cosmopolitanism this distinction between aspiration and practice can often be quite ambiguous This book therefore brings together five contributions from anthropologists who are reporting on encounters and aspirations that reveal different forms of spatial mobility scales of commitment or risk and are often transient ambivalent and precarious These are circumstances in which cosmopolitanism

emerges as uneven and partial rather than as a comprehensive or unequivocal transformation of practice and outlook This book was originally published as a special issue of *Identities Global Studies in Culture and Power* *The Clipboard* ,1988
