Kinetic Family Drawing Guide:

Action, Styles, And Symbols In Kinetic Family Drawings Kfd Robert C. Burns, S. Harvard Kaufman, 2013-05-13 First published in 1972 Routledge is an imprint of Taylor Francis an informa company **Kinetic Family Drawings (K-F-D)** Robert C. Burns, S. Harvard Kaufman, 1970 **Exploring the Child's Personality** Coulacoglou Carina, 2008 The objective of this book is to provide readers with a comprehensive account of the child's personality. The book examines in detail significant personality dimensions from developmental, clinical, and cross cultural perspectives. The intricacies of personality are exposed by means of the Fairy Tale Test, an instrument that attempts to track the preconscious and unconscious processes that lie beneath the behavioral and overt manifestations of personality. Children's responses to the FTT questions are assessed both from a quantitative and a qualitative perspective. Twenty nine personality variables are used to rate the broad range of personality characteristics. No other personality test assesses such a large number of personality parameters. The qualitative evaluation of responses includes the analysis of 14 defense mechanisms, the study of the nature of anxiety, family dynamics, and the examination of ego integration and ego strength. The unique quality of this book is the use of the FTT in the exploration of the child's personality using large samples of children derived from diverse cultures. Additional advantages of this book are the chapters which focus on the research into two significant personality traits: aggression and ambivalence, and the chapter on the analysis of idiosyncratic responses; the latter offers valuable information in the classification of original responses into levels of psychopathology. While the FTT has taken significant steps towards becoming a valid and reliable instrument, studies of its psychometric properties are an ongoing process. The book also includes examples, case studies, and appendices for further study and review. **Drawings in Assessment and Psychotherapy** Leonard Handler, Antoinette D. Thomas, 2013-11-20 Drawing is a language projected by children and adults reflecting their joy and pain. It is used extensively by clinical psychologists, art therapists, social workers, and other mental health professionals in the assessment and treatment of children, adolescents, adults, and couples. This book brings together a renowned group of professionals to analyze the research and application of the most popular assessment and treatment tools. Tests discussed include the Draw a Person Test, the House Tree Person Test, the Kinetic Family Drawing Test, the Art Therapy Projective Imagery Assessment, and the Wartegg Drawing Completion Test. Working with sexually and physically abused children, assessing clients with anorexia nervosa, and the influence of osteopathic treatment on drawings are some of the special topics considered. Numerous case studies are also included. A Comprehensive Guide to Child Psychotherapy and Counseling Christiane Brems, Christina H. Rasmussen, 2018-08-08 Christiane Brems, in collaboration with new coauthor Christina Rasmussen, introduces prospective and practicing clinicians to theories and principles of applied clinical work with children, ages three to twelve years. The authors take an integrated approach to understanding children and their families using a biopsychosociocultural model for conceptualization and treatment planning. Their methods are

practical and compassionate as well as contextually grounded and individually tailored Chapters follow the logical development of clinicians mirroring the natural flow of work with children Coverage ranges from the importance of a beginning practitioner s introspection and of ethical and legal issues to a variety of intervention techniques and strategies and finally termination Case studies showcase individualized and mindful treatment for each child with whom a clinician works Outstanding Features of the Fourth Edition Essential attention to how clinicians self awareness can lead to positive therapeutic relationships with children and their families Thorough discussions of the biopsychosociocultural model for conceptualization and treatment planning Emphasis on intensive assessment prior to treatment planning to address the needs of each child and family A compelling practical exploration of mindfulness intervention with children The authors methodology addresses the profound effects of the larger environment and culture on children By adopting the authors integrated approach clinicians are better able to understand important and complicated aspects of a child s and family s life From there compassionate thoughtful and relevant intervention ensues
