Paper Heritage in Italy, France, Spain and Beyond (16th to 19th Centuries) Benedetta Borello, Laura

Casella, 2023-11-30 This book takes a long term approach spanning from the end of the 16th to the end of the 19th centuries to explore how men and women in Italy France and Spain collected displayed and passed down various types of papers The contributors share a core interest in the relationship between social actors and their paper heritage The collectors who come from diverse cultural social and gender backgrounds provide insights into the reasons and processes behind the accumulation valorisation and transmission of their paper heritage Unlike most studies on collecting this book shifts the focus away from collections and institutions to the owners of the collected objects and their desires for their accumulated papers This volume covers three centuries and provides insights into the aspirations of collectors and the fate of their papers after transmission It takes place against the backdrop of major social political and cultural changes affecting the Italian peninsula the Spanish monarchy and France The cultural interests and the collector networks often extended beyond Europe as noted by many of the essays in this volume Paper Heritage in Italy France Spain and Beyond 16th to 19th Centuries will interest scholars and students of Early Modern and Modern European History across various fields including social and cultural history intellectual history gender history history of collecting and patronage *China's Economy* Iris Claus, Les

Technological progress and globalization have generated indisputable benefits but also relevant costs such as growing economic inequality economic fluctuations and financial instability Mainstream economics has usually considered these costs as temporary evenly distributed and more than compensated by the gains of the phases of economic expansion In this book which focuses mainly though not only on the labor market the authors contend that the major costs of the intensified process of creative destruction through which economic change proceeded have been ignored and the benefits overrated thus incorrectly estimating the net impact of economic growth on subjective wellbeing The book argues that the positive consequences of economic change and globalization may not compensate for the negatives because psychological losses are felt more strongly than gains due to loss aversion and the costs are unequally distributed those on low incomes disproportionately suffer more The result is an overall reduction in wellbeing and therefore appropriate policies are

necessary to allow more people to enjoy the benefits of technological progress without suffering the costs The authors develop a comprehensive framework in which the socio psychological context and educational level of a community determine the most suitable policies both for the short and for the long run The book makes an invaluable contribution to the literature on economic growth and development labor economics the economics of wellbeing and applications of behavioral economics The readers that may be interested in this book are economists and other social scientists but also general readers since the analysis is maintained simple and accessible University teachers can use the book for courses on economic growth and development on labor economics on the economics of human capital on the economics of wellbeing and on applications of behavioral economics
