Stevens,1993-06-14 Stevens examines institutional frameworks for Crown corporations in Alberta Saskatchewan and Manitoba between the early 1970s and the mid 1980s showing how each framework establishes different practices and offers distinct strategic advantages Organizational approaches in Alberta most closely approximated what the author calls a self contained design in which corporate actors had the advantage and were most able to achieve their own objectives In Manitoba where vertical information systems prevailed

central bureaucratic monitoring agents tended to some extent to wield influence over the corporations Saskatchewan practice was akin to a lateral relations pattern with an equilibrium between corporate and bureaucratic goals Stevens s comparison of Crown corporation organization designs suggests that while no one form is inherently more efficient than another each leads to qualitatively different outcomes He concludes that the most important issue in problems of organization design is who is winning the Crown corporation game a finding of considerable interest to all students of government enterprise **InfoSource**, 1993 **Judicial Administration in Canada** Perry S. Merari, 2021-03-25 The search for a distinct terrorist profile has been going on for many years and while it is generally agreed that nobody is born a terrorist there is plenty of disagreement about why a person might become one Whereas personal and situational push and pull factors can be combined to determine how and why young people become involved in terrorism preventing an individual from following a path that ends in violence without moral restraint poses an enormous challenge especially in an open society This book presents papers from the NATO Advanced Research Workshop titled A Review of the Utility of Existing Terrorism Risk Assessment Instruments and Policies Is there the Need for Possible New Approaches held in Berlin Germany on 29 30 November 2019 Researchers were asked to present papers for discussion sessions with invited participants and practitioners from a number of NATO member and partner countries Various assessment instruments for identifying problematic individuals at an early stage were presented by experts It was generally agreed that due to cultural religious and other differences there is no simple way to identify the relatively few high risk individuals among the larger population of politically radicalized but not necessarily violent individuals who pose no threat Framed by an Introduction and Conclusion the 16 chapters in the book are divided into three parts Theory and Risk Threat Assessment Instrument Policy Themes Implementation of Politically Motivated Terrorism Protocols and Personality Traits Disorders Anti State Terrorism Profiles and the DSM 5 Personality Trait Instrument This practice oriented book will be of interest to all those tasked with protecting society from some of its most dangerous members **Soil and Soil Fertility Management Research in Sub-Saharan Africa** Henk Mutsaers, Danny Coyne, Stefan Hauser, Jeroen Huising, Alpha Kamara, Generose Nziguheba, Pieter Pypers, Godfrey Taulya, Piet van Asten, Bernard Vanlauwe, 2017-03-27 Judicious soil fertility management is crucial for sustainable crop production and food security in sub Saharan Africa SSA This book describes the various concepts and approaches underlying soil and soil fertility management research in SSA over the last fifty years It provides examples of important innovations generated and assesses the position of research within the research to development continuum including how innovations have been validated with the intended beneficiaries Using the experience of the International Institute of Tropical Agriculture IITA as a case study the authors analyse how processes partnerships and other factors have affected research priorities the delivery of outputs and their

Focused on the concept of community in post disaster recovery solutions an aspect which has received little critical interrogation in the literature this book will be a valuable resource to students and scholars in disaster management as well as humanitarian agencies
