Building Fraction Ideas Carolyn A. Maher, Dina Yankelewitz, 2017-06-10 This book may be used for research graduate and undergraduate teacher education and teacher development It presents an integrated set of studies of a heterogeneously grouped class of twenty one nine year olds engaged in exploring fraction ideas prior to classroom instruction under conditions that supported investigation collaboration and argumentation It demonstrates with text and video narrative how young children can reason about mathematics in surprisingly sophisticated ways when provided the opportunity to do so in the proper classroom environment In this volume fourth grade students reasoning about fraction concepts is described through careful analysis and accompanying video excerpts showcasing the variety and originality of their thinking These children will serve as an inspiration for educators to encourage the development of reasoning and argumentation in their students as part of a mathematics curriculum designed to produce critical thinkers **Jenniema & James Brooke**

Newman, 2011-04-05 James Newman was a brilliant mathematician the man who introduced the mathematical concept

googol and googolplex aka google and googleplex to the world and a friend of Einstein's. He was also a notorious philanderer with an insatiable appetite for women and fast cars, a man who challenged intellectual and emotional limits and a man of excess who oftentimes fell victim to his own anxiety. Jenniemae Harrington was an uneducated illiterate African American maid from Alabama who began working for the Newman family in 1948 and who despite her devout Christianity played the illegal underground lottery called policy which she won with astonishing frequency. Though highly implausible, these two dissimilar individuals developed a deep and loyal friendship largely because of their common love of numbers and their quick wits. There was a friendship that endured even during an era when segregation still prevailed. For James, Jenniemae provided a particular ease and shared sense of irreverent humor that he found difficult to duplicate with his beautiful intelligent and artistic wife Ruth. And when the Newman home was darkened by the tensions of the political climate during the Cold War or by James's affairs or by Ruth's bouts of depression, it was Jenniemae who maintained the point of gravity, caring for the family's children when their parents were often lost in their own worlds. From Jenniemae's perspective, James offered more than just a steady income. He became an unlikely and loyal friend. He taught her to read and he drove her to and from his upscale suburban house and her home in the impoverished section of Washington D.C. and sometimes much to her chagrin in his Rolls Royce after she had been raped by a white bus driver. Intrigued by her uncanny wins at the lottery, James even installed a second telephone line in the house so that Jenniemae could keep track of her bets, a decision that raised a few eyebrows at the time. It is this extraordinary relationship that the Newmans' daughter Brooke reveals in *Jenniemae* when America was reeling from the McCarthy hearings when technological advances like television, satellites, and interstate highways were changing the country when America was just beginning to venture into Vietnam and when African Americans were still considered second-class citizens with limited rights before the explosion of racial tensions in the early 1960s. *Jenniemae* James is an inspiring heartwarming memoir about friendship and love across the racial barrier.
