Inserting nano SIM and microSD cards

IMPORTANT:

Use a standard nano SIM only.

Don't cut a micro or regular SIM card and insert it into the nano SIM slot. It's thicker than the standard nano SIM card and may get stuck in the slot.

Don't disassemble any part of the phone.

Don't try to open the phone or remove the battery by force. This may damage the phone or its electronics and will invalidate the warranty.

Don't throw the tray away.

You need it to insert your nano SIM and microSD™ cards.

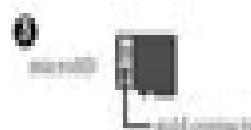

1. With the phone lying up, insert the tip of the tray eject tool that came in the box (or a small bent paperclip) into the tray eject hole.

Push the tip all the way into the hole until the card tray ejects and then gently pull the tray out.

2. With the gold contacts facing down, place your nano SIM and microSD cards into the SIM 1, SIM 2, and SD holders of the tray. Make sure to align the cut-off corners of the nano SIM cards to the notches on the holders.

Note: By default, SIM 1 will connect to the 4G LTE/3G network,

and SIM 2 will connect to 3G/2G. To find out how to change network connection settings for your nano SIM cards, see the user guide.

3. When reinserting the tray, make sure it is facing up so that the cards don't fall out. Hold the tray with the microSD card between your fingers, and then steadily slide the tray all the way into the slot.

Restarting the phone

To restart your phone when it doesn't respond to touch screen or button presses, press and hold the POWER button (for 8 to 10 seconds) until the phone vibrates, and then release the button.
