A PRACTICAL GUIDE TO LEADERSHIP AND MANAGEMENT IN ACADEMIC RADIOLOGY Ronald L. Arenson,Cathy Garzio,2012-01-01 This is a practical nuts and bolts guide that is based on the authors experience and success in the Radiology Department at the University of California at San Francisco Academic chairs especially those recently appointed struggle with leadership and management Many have little

prior experience in these areas The material presented here is practical and specific Each chapter is independent of the others and the text can be used mostly as a reference tool The text deals with the major issues facing academic Radiology leaders The topics selected were chosen carefully and are based on the authors collective years of experience attempting to manage their own department but also consult for many others The first topic is the balance among the three primary missions of an academic department namely clinical care teaching and research These three major missions will be described in some depth with an effort to provide reference materials that hopefully will stand the test of time and remain useful over the years to come In addition this text will provide guidance about faculty development departmental organization marketing and fundraising and strategic perspectives It will be of interest to chairs departmental administrators vice chairs and other departmental leaders section chiefs hospital administrators and of course consultants

Practitioner's Guide to Health Informatics Mark L. Braunstein, 2015-04-13 This book will be a terrific introduction to the field of clinical IT and clinical informatics Kevin Johnson Dr Braunstein has done a wonderful job of exploring a number of key trends in technology in the context of the transformations that are occurring in our health care system Bob Greenes This insightful book is a perfect primer for technologists entering the health tech field Deb Estrin This book should be read by everyone David Kibbe This book provides care providers and other non technical readers with a broad practical overview of the changing US healthcare system and the contemporary health informatics systems and tools that are increasingly critical to its new financial and clinical care paradigms US healthcare delivery is dramatically transforming and informatics is at the center of the changes Increasingly care providers must be skilled users of informatics tools to meet federal mandates and succeed under value based contracts that demand higher quality and increased patient satisfaction but at lower cost Yet most have little formal training in these systems and technologies Providers face system selection issues with little unbiased and insightful information to guide them Patient engagement to promote wellness prevention and improved outcomes is a requirement of Meaningful Use Stage 2 and is increasingly supported by mobile devices apps sensors and other technologies Care providers need to provide guidance and advice to their patients and know how to incorporate as they generate into their care The one patient at a time care model is being rapidly supplemented by new team population and public health based models of care As digital data becomes ubiquitous medicine is changing as research based on that data reveals new methods for earlier diagnosis improved treatment and disease management and prevention This book is clearly written up to date and uses real world examples extensively to explain the tools and technologies and illustrate their practical role and potential impact on providers patients researchers and society as a whole
