**Quality of Decision-making in Public Law** Kars Jan Graaf, 2007 Administrative decisions of government agencies are a fact of present day life and the general public is confronted with them all the time Therefore the legal quality of administrative decisions matter to people It is in the interest of the individual person and the general public that agencies produce legally proper decisions right away Correctional court procedures are cumbersome and costly both to the individual objector and to the tax payer Moreover public agencies with a reputation of doing things right the first time will generate public trust in government and reinforce the legitimacy of public decision making The main theme of this collection of essays is to do things right the first time The collection draws on the combined research experience of a group of Dutch scholars in public law and public administration Thus the topic is examined from a variety of angles and perspectives Some of the papers deal with basic questions such as What could be the meaning of the concept of legal quality

How can it be applied when assessing administrative decision making Other essays examine conditions for enhancing legal quality both in public law and in public organizations Also included are some topical studies that present specific issues in the legal quality of administrative decision making

**Laruelle** Anthony P. Smith, 2017-09-05 *Fran ois Laruelles non philosophy or non standard philosophy* represents a bold attempt to rethink how philosophy is practiced in relation to other domains of knowledge There is a growing interest in Laruelles work in the English speaking world but his work is often misunderstood as a wholesale critique of philosophy In this book Anthony Paul Smith dispels this misunderstanding and shows how Laruelles critique of philosophy is guided by the positive aim of understanding philosophys structure so that it can be creatively recast with other discourses and domains of human knowledge from politics and ethics to science and religion This book provides a synthetic introduction to the whole of Laruelles work It begins by discussing the major concepts and methods that have framed non philosophy for thirty years Smith then goes on to show how those concepts and method enter into traditional philosophical domains and disempower the authoritarian framework that philosophy imposes upon them Instead of offering a philosophy of politics or a philosophy of science Laruelle aims at fostering a democracy of thought where philosophy is thought together and equal to the object of its inquiry This book will be essential reading for students and scholars interested in contemporary French philosophy and anyone who wants to discover more about one of its foremost practitioners

**Blind Oracles** Bruce Kuklick, 2013-10-24 In this trenchant analysis historian Bruce Kuklick examines the role of intellectuals in foreign policymaking He recounts the history of the development of ideas about strategy and foreign policy during a critical period in American history the era of the nuclear standoff between the United States and the Soviet Union The book looks at how the country s foremost thinkers advanced their ideas during this time of United States expansionism a period that culminated in the Vietnam War and d tente with the Soviets Beginning with George Kennan after World War II and concluding with Henry Kissinger and the Vietnam War Kuklick examines the role of both institutional policymakers such as those at The Rand Corporation and Harvard s Kennedy School and individual thinkers including Paul Nitze McGeorge Bundy and Walt Rostow Kuklick contends that the figures having the most influence on American strategy Kissinger for example clearly understood the way politics and the exercise of power affects policymaking Other brilliant thinkers on the other hand often played a minor role providing at best a rationale for policies adopted for political reasons At a time when the role of the neoconservatives influence over American foreign policy is a subject of intense debate this book offers important insight into the function of intellectuals in foreign policymaking

This edited volume addresses the main lessons and legacies of the 1962 Cuban Missile Crisis from a global perspective Despite the discoveries of recent research there is still much more to be revealed about the handling of nuclear weapons before and during the Cuban Missile Crisis CMC Featuring contributions from a number of eminent international scholars of nuclear history intelligence espionage political science and Cold War studies An International History of the Cuban Missile Crisis reviews and reflects on one of the critical moments of the Cold War focussing on three key areas First the volume highlights the importance of memory as an essential foundation of historical understanding and demonstrates how events that rely only on historical records can provide misleading accounts This focus on memory extends the scope of the existing literature by exploring hitherto neglected aspects of the CMC including an analysis of the operational aspects of Bomber Command activity explored through recollections of the aircrews that challenge accounts based on official records The

editors then go on to explore aspects of intelligence whose achievements and failings have increasingly been recognised to be of central importance to the origins dynamics and outcomes of the missile crisis Studies of hitherto neglected organisations such as the US Defense Intelligence Agency DIA and the British Joint Intelligence Committee JIC both extend our understanding of British and American intelligence machinery in this period and enrich our understanding of key episodes and assessments in the missile crisis Finally the book explores the risk of nuclear war and looks at how close we came to nuclear conflict The risk of inadvertent use of nuclear weapons is evaluated and a new proposed framework for the analysis of nuclear risk put forward This volume will be of much interest to students of intelligence studies international history foreign policy security studies and IR in general *Foreign Policy Motivation* Richard W. Cottam, 1977-01-15 Foreign policy motivation is a complex mix reflecting the fears and aspirations of public interest groups bureaucratic sets and important individuals International conflict cannot be resolved without resolving how foreign policy is motivated This book presents a conceptual framework for identifying and weighing foreign policy motives that shape direct and alter foreign policy *Principles of Non-Philosophy* Francois Laruelle, 2013-05-09 Principles of Non Philosophy is a treatise on the method axioms and objectives of non philosophy and represents Francois Laruelle's mature philosophy As well as presenting the method and principles of non philosophy it includes a history of the development of non philosophy a novel conception of science a discussion of non philosophical causality and new theories of the subject and object of thought Providing an introduction to Laruelle's novel theory of non epistemology or unified theory of thought this volume challenges the way we think about the traditional philosophical problems Bringing together all the elements of his thought developed over twenty years and laying the foundations for his later work Principles of Non Philosophy is arguably Laruelle's magnum opus *Report of Decisions of the Industrial Accident Commission of the State of California* California. Industrial Accident Commission, 1916 [Report of Decisions of the Industrial Accident Commission of the State of California for the Year ...](#) California. Industrial Accident Commission, 1916 **Report of Decisions of the Industrial Accident Board and Industrial Accident Commission of the State of California** California. Industrial Accident Commission, 1916 *The Sources of Military Doctrine* Barry R. Posen, 2014-09-10 Barry R Posen explores how military doctrine takes shape and the role it plays in grand strategy that collection of military economic and political means and ends with which a state attempts to achieve security Posen isolates three crucial elements of a given strategic doctrine its offensive defensive or deterrent characteristics its integration of military resources with political aims and the degree of military or operational innovation it contains He then examines these components of doctrine from the perspectives of organization theory and balance of power theory taking into account the influence of technology and geography Looking at interwar France Britain and Germany Posen challenges each theory to explain the German Blitzkrieg the British air defense system and the French Army's defensive doctrine often associated with the Maginot Line This rigorous comparative study in which the balance of power theory

emerges as the more useful not only allows us to discover important implications for the study of national strategy today but also serves to sharpen our understanding of the origins of World War II
