Essential Physics for Manual Medicine E-Book Martin Ferrier Young, 2009-09-16 A textbook that covers Physical concepts at a basic level for manual therapists specifically. Clinicians in general and manual therapists in particular have a need to understand certain specific aspects of physics to an advanced level. However many lack prior education in this area with chemistry and biology A levels being emphasized in terms of entrance requirements. Most textbooks aimed at this field concentrate exclusively on the physics underpinning biomechanics but the level at which these books are pitched is often too high to allow understanding by students who have an inadequate background in the subject. This book acts in part as a primer to address this deficit. Students are also required to understand the basic physics underpinning physiology biochemistry radiography and therapeutics. This textbook will be a guide to these specialist areas of knowledge. This text will cover biophysics as a core subject to guide the potential clinician from total ignorance to complete mastery in the areas of physics pertinent to manual medicine and its related disciplines. Self assessment questions at the beginning of each chapter allow readers to check their existing knowledge prior to reading the chapter. Each section builds from basic principles to advanced levels. Clinical focus

After Popper, Kuhn and Feyerabend R. Nola, H. Sankey, 2012-12-06 Some think that issues to do with scientific method are last century's stale debate. Popper was an advocate of methodology but Kuhn Feyerabend and others are alleged to have brought the debate about its status to an end. The papers in this volume show that issues in methodology are still very much alive. Some of the papers reinvestigate issues in the debate over methodology while others set out new ways in which the debate has developed in the last decade. The book will be of interest to philosophers and scientists alike in the reassessment it provides of earlier debates about method and current directions of research
