School Mathematics Project,1999 What Every Principal Should Know About Strategic Leadership Jeffrey Glanz,2005-11-10 Strengthen and hone your strategic leadership skills for effective school planning This is an essential guide for new and veteran school leaders focused on strategic planning data driven decision making and transformational leadership A comprehensive and practical handbook it provides nine steps to strategic planning plus guidelines for promoting a vision and mission using data to empower and implement change evaluating school programs and moving from micro political to transformational leadership practice This last volume in a seven part leadership series features examples and best practice including Insightful questionnaire and response analysis Case study with reflective questions What You Should Know About sections framing each chapter Self assessment resources for leadership effectiveness In Basket Simulations exploring real life examples For leadership that can empower and transform a school community this insightful volume provides a sure footed path for leaders seeking to foster and manage effective and lasting change *Becoming the System* Nelson Flores,2024 Bilingual education is usually framed as a tool of antiracism In *Becoming the System* author Nelson Flores challenges that framework by examining the ways that institutionalizing bilingual

education in the post Civil Rights Era in the United States has served to maintain rather than challenge racial hierarchies He adopts a methodology that he terms raciolinguistic genealogy as a point of entry for arguing that the institutionalization of bilingual education was part of a broader reconfiguration of race in the postcolonial era This reconfiguration located the root of racial inequities within a psychologically damaged racialized subject who after having experienced multiple generations of racial oppression had either from a liberal perspective developed a culture of poverty or a radical perspective developed colonized mindset that prevented racial progress After examining the ways that this psychologically damaged racialized subject provided the ideological foundation for the Bilingual Education Act BEA Flores then examines how institutionalizing the BEA produced a cadre of Latinx professionals who were afforded contingent proximity to whiteness in exchange for their acceptance of deficit framings of Latinx communities He goes on to examine the ways that this institutionalization helped pave the way for neoliberal educational reforms that serve to maintain the racial status quo This has culminated in the exponential growth of dual language education as a commodity for affluent monolingual white families even as the bilingualism of Latinx communities continue to be pathologized and policed Flores concludes by implicating himself as a Latinx professional working in bilingual education in this political incorporation and posits the present volume as resistance to the commodification and weaponization of Latinx bilingualism

Implementing and Analyzing Performance Assessments in Teacher Education Joyce E. Many, Ruchi Bhatnagar, 2017-12-01 Teacher education has long relied on locally developed assessments that lack reliability and validity Rigorous performance based assessments for preservice teachers have been advanced as one possible way to ensure that all students receive instruction from a high quality teacher Recently performance based assessments have been developed which focus on the application of knowledge of teaching and learning in a classroom setting Our book explores factors related to the implementation of teacher performance assessments in varying state and institutional contexts The contributors teacher educators from across the country focus on what was learned from inquiries conducted using diverse methodologies quantitative qualitative self studies and mixed methods Their research encompassed faculty supervisors cooperating teachers and students perceptions and concerns of teacher performance assessments case studies of curricular reform and or resistance analyses of experiences and needs as a result of the adoption of such assessments and examinations of the results of program alignment and reform The chapters showcase experiences which occurred during high stakes situations in implementation periods prior to high

stakes adoption and in contexts where programs adopted performance assessments as an institutional policy rather than as a result of a state wide mandate

Endorsements

The chapters compiled for *Implementing and Analyzing Performance Assessments in Teacher Education* edited by Joyce E Many and Ruchi Bhatnagar present a thoughtful look at the challenges and solutions embedded in the adoption of teacher performance assessments for preservice teachers. Most chapters feature edTPA the most commonly used performance assessment now mandated in numerous states and used voluntarily by other programs across the country and reveal how such assessments shine a bright light on the problems of practice in teacher preparation: stressful timelines, faculty silos, communication with P-12 partners etc. when new requirements disrupt the status quo. Each chapter tells a valuable story of performance assessment implementation and approaches that offset compliance in favor of inquiry and educative experiences for candidates and programs alike.

Andrea Whittaker, Ph.D., edTPA National Director, Stanford University Graduate School of Education, U.S. SCALE

Many and Bhatnagar launch the AAPE book series with a curated volume highlighting the contexts in which teacher educators implement and utilize performance assessments in educator preparation. Together the chapters present research from various viewpoints from candidates, faculty, university supervisors and clinical partners using diverse methodologies and approaches. The volume contributes significantly to the program assessment research landscape by providing examples of how performance assessments inform preparation at the intersection of praxis and research and campus and field. These chapters provide a critical foundation for teacher educators eager to leverage performance assessments to improve their programs.

Assessment of Authentic Performance in School Mathematics Richard A. Lesh, Susan J. Lamon, 2013-04-03 This book is the result of a conference sponsored by the Educational Testing Service and the University of Wisconsin s National Center for Research in Mathematical Sciences Education The purpose of the conference was to facilitate the work of a group of scholars whose interests included the

assessment of higher order understandings and processes in foundation level pre high school mathematics Discussions focused on such issues as the purposes of assessment guidelines for producing and scoring real life assessment activities and the meanings of such terms as deeper and higher order understanding cognitive objectives and authentic mathematical activities Assessment was viewed as a critical component of complex dynamic and continually adapting educational systems During the time that the chapters in this book were being written sweeping changes in mathematics education were being initiated in response to powerful recent advances in technology cognitive psychology and mathematics as well as to numerous public demands for educational reform These changes have already resulted in significant reappraisals of what it means to understand mathematics of the nature of mathematics teaching and learning and of the real life situations in which mathematics is useful The challenge was to pursue assessment related initiatives that are systematically valid in the sense that they work to complement and enhance other improvements in the educational system rather than act as an impediment to badly needed curriculum reforms To address these issues most chapters in this book focus on clarifying and articulating the goals of assessment and instruction and they stress the content of assessment above its mode of delivery Computer or portfolio based assessments are interpreted as means to ends not as ends in themselves Assessment is conceived as an ongoing documentation process seamless with instruction whose quality hinges upon its ability to provide complete and appropriate information as needed to inform priorities in instructional decision making This book tackles some of the most complicated issues related to assessment and it offers fresh perspectives from leaders in the field with the hope that the ultimate consumer in the instruction assessment enterprise the individual student will reclaim his or her potential for self directed mathematics learning
