

0-4 Introduction

The Fiat Punto range was introduced in March 1994 with 1108 cc, 1242 cc and 1372 cc petrol engines and a 1698 cc diesel engine. At first, models were only available in 5-door Hatchback form, however 3-door versions followed in May 1994 and Cabriolet and Automatic versions in June 1994. At the same time a turbo diesel model was launched. Power-assisted steering and ABS were offered as options in October 1994, and the 6-speed 55SX and normally-aspirated diesel followed in June 1995. In June 1997 a minor facelift was undertaken which included improvements to the suspension and steering and various cosmetic changes. This facelift also saw the introduction of the 1242 cc DOHC 16-valve engine available in top of the range models.

All engines covered in this Manual are fitted with single- or double-overhead-camshaft engines, and all models have fully independent front and rear suspension. The distinguished lines of the bodywork together with the high level rear lighting have made the Fiat Punto a very popular small car.

Provided that regular servicing is carried out in accordance with the manufacturer's recommendations, the Fiat Punto should prove reliable and economical. The engine compartment is well-designed, and most of the items needing frequent attention are easily accessible.

Paul Buckland

Your Fiat Punto Manual

The aim of this manual is to help you get the best value from your vehicle. It can do so in several ways. It can help you decide what work must be done (even should you choose to get it done by a garage), provide information on routine maintenance and servicing, and give a logical course of action and diagnosis when random faults occur. However, it is hoped that you will use the manual by tackling the work yourself. On simpler jobs, it may even be quicker than booking the car into a garage and going there twice, to leave and collect it. Perhaps most important, a lot of money can be saved by avoiding the costs a garage must charge to cover its labour and overheads.

The manual has drawings and descriptions to show the function of the various components, so that their location can be understood. Then the tasks are described and photographed in a clear step-by-step sequence.
