

Thank you for purchasing a Firex smoke alarm. It is an important component of your home security system. Please read this booklet thoroughly. The more familiar you are with the information it contains, the easier you will find it to install, operate, and maintain your smoke alarm properly, which ultimately means greater security and peace of mind for you and your family.

Smoke Alarm Advantages

Fire protection type alarms are generally more effective at detecting fire, warning you, and alerting your family more quickly and easily than any other type of alarm. Alarms of most other types include flammable liquids or gases burning in a room's contents. The photoelectric type alarm is generally more effective at detecting fires, including fires which cannot be seen before burning into flames. Because of these two advantages, photoelectric smoking is superior to smoking. However, both types of alarm are designed to provide adequate detection of both types of fires. If you have the photoelectric type alarm, you should install smoke alarm that contains a ionization type photoelectric and ionization sensing technology.
