Understanding Experiences of First Generation University Students Amani Bell, Lorri J. Santamaría, 2018-02-22 Over the past few decades universities have opened their doors to students whose parents and grandparents were historically excluded from societal participation and higher education for reasons associated with racial ethnic socio economic and or linguistic diversity Many of these students are first generation or first in their family to attend university While some progress has been made in responding to the needs of these internationally underserved learners many challenges remain This edited book features the unique and diverse experiences of first generation students as they

transition into and engage with higher education whilst exploring ways in which universities might better serve these students With reference to culturally responsive and sustaining research methodologies undertaken in Australia Canada New Zealand South Africa the UK and the USA the contributors critically examine how these students demonstrate resilience within university and ways in which success and challenges are articulated Elements that are unique to context and shared across the international higher education milieu are explored The book is replete with diverse student voices and compelling implications for practice and future research The studies featured are centred on underlying theories of identity and intersectionality while valuing student voices and experiences Throughout the emphasis is on using strengths based indigenous and decolonised methodologies Through these culturally sustaining approaches which include critical incident technique participatory learning and action talanoa and narrative inquiry the book explores rich data on first generation student experiences at seven institutions in six countries across four continents

A Better Future Jacqueline Bhabha, Wenona Giles, Faraaz Mahomed, 2020-09-17 This book explores the exclusion of underprivileged groups from higher education a critical frontier for diversity and equality endeavors

Corrupted Jonathan D Jansen, 2023-02-01 In South African higher education the images of dysfunction are everywhere Student protests Violence Police presence Rubber or real bullets Class disruptions Burning tyres Damaged buildings Injury and sometimes death Reports of wholesale corruption Year after year often in the same set of universities the problem of routine instability seems insoluble The financial academic and reputational costs of ongoing dysfunction are high especially for those universities caught up in the never ending struggle to overcome apartheid legacies Any number of explanations have been ventured including a lack of resources shortage of capacity rural location corrupt officials and endemic conflict *Corrupted* takes a deeper look at dysfunction in an attempt to unravel the root causes in a sample of South African universities At the heart of the problem lies the vexed issue of resources or more pertinently the relationship between resources and power who gets what and why Whatever else it aspires to be commonly a place of teaching learning research and public duty a university in an impoverished community is also a rich concentration of resources around which corrupt staff students and those outside of campus all vie for access Taking a political economic approach Jonathan Jansen describes the daily struggle for institutional resources and offers accessible sensible insights He argues that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities Rather durable solutions would include the depoliticisation of university councils and appointments of academics with integrity and capacity to manage and lead these fragile institutions This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly

Knowledge Beyond Colour Lines Monwabisi K.

Ralarala, Salochana Lorraine Hassan, Rajani Naidoo, 2021-05-25 Knowledge remains timely in education The need for academics to contemplate its relevance worth use and everything in between deems a continuous intellectual project rather than a conundrum to be solved This book takes the South African context by the horns as it challenges the often dormant and traditionalist ways in which higher education spaces see knowledge Through original research and the voices of academics and students this book argues for repurposing knowledge generation knowledge sharing and critical pedagogy so that more inclusive teaching and learning environments can be both imagined and sustained The contentious tensionalities that this creates for LoLT and SoTL in particular are unlocked so as to trouble the South African higher education landscape with the intent to proffer alternative pathways for a knowledge beyond colour lines Prof Shan Simmonds PhD NWU This edited volume bristles with fresh scholarly approaches and insights of an emergent generation of engaged scholars grappling with the issues and problems of higher education in South Africa The issues dealt with here are varied and encompassing They are treated with intellectual delicacy and probing sensitivity articulacy informed data and bold conclusions They serve well Prof Kwesi Kwaa Prah Emeritus Professor of Sociology University of the Western Cape Founder of the Centre for Advanced Studies of African Society *Numbers & Needs* Allyson Lawless, 2005 **Contemporary India and South Africa** Sujata Patel, Tina Uys, 2013-11-12 This book deals with the legacies of the Indian experiences of migration and diaspora in South Africa It highlights the social imaginaries of the migrants and citizens as they negotiate between a reconstructed notion of India and their real present and future in the country of citizenship Both South Africa and India have had a long history of group based identity movements against exploitation around caste and race intersecting with class gender language religion and region The combined history has allowed them to participate in novel ways in the global arena as regional powers The book suggests that the question of identity concerns itself with exploitation and oppression of excluded groups in both countries The authors are particularly attentive to the manner in which the two democratic states have confronted the challenges of history together with contemporary demands of inclusion and discuss the dilemmas involved in resolving them The volume also raises questions regarding future roles especially in the fields of education and the environment It will be of interest to those in the fields of sociology political science international relations history migration and diaspora studies as well as to the general reader **The National Skills Development Handbook 2010/11**, 2010 The Formation of Intellectual Capital and Its Ability to Transform Higher Education Institutions and the Knowledge Society Cardoso Espinosa, Edgar Oliver, 2019-06-28 The knowledge society arises from the combination of four interdependent elements the production of knowledge through research its transmission through education its dissemination through information and communication technologies and its exploitation through innovation For this reason higher education institutions HEIs are the main component of the formation of intellectual capital because they are the key element of the knowledge society so it is necessary that they continue to be the main source of the necessary skills that allow the increase of economic

Feeling lives: An intersectional exploration of past experiences and present living Lindsay Clowes,LJ Theo,Nadia Sanger,Landa Mabenge,Sisa Ngabaza,2023-11-15 We each make sense of the world through our embodied feeling lives We do it through the social groupings contexts and processes which history rather than biology presents and assigns to us In this collection we aim to illustrate how these embodied feelings and emotions underpin contemporary theorising by sharing reflective autobiographical writing by individuals from a wide range of backgrounds and contexts This somewhat unruly collection unsettles conventional academic writing precisely because authors have grounded themselves in the tangible and the personal rather than in abstract theory We hope that readers might see aspects of their own lives in some of these stories develop better understandings of lives that are experienced very differently and start or continue to theorise their own lives

Multilingual classroom contexts Christa van der Walt,Verbra Pfeiffer,2021-12-01 By far the majority of South African students get their schooling in a second language which means that our classrooms are multilingual This state of affairs is not exclusive to our country as can be seen in the many academic conferences on multilingual learning and teaching Terms like translanguageing and biliteracy appear in many articles and books that discuss the role language in education What makes the multilingual nature of our South African classrooms challenging is the fact that many learners switch from one language of learning and teaching to another at various points in their school career from home language to

English or Afrikaans after the foundation phase from one language of learning and teaching to another when they move to new schools high school or tertiary institutions This book is an attempt to highlight the transitions from home to school from foundation to intermediate phase from primary to high school and from high school to tertiary institutions *Handbook of Research on Social, Cultural, and Educational Considerations of Indigenous Knowledge in Developing Countries* Ngulube, Patrick, 2016-09-29 Knowledge systems are an essential aspect to the preservation of a community's culture In developing countries this community based knowledge has significant influence on such things as decision making and problem solving The *Handbook of Research on Social Cultural and Educational Considerations of Indigenous Knowledge in Developing Countries* is an authoritative reference source for the latest scholarly research on the importance of knowledge and value systems at the community level and ways indigenous people utilize this information Highlighting impacts on culture and education in developing nations this book is ideally designed for researchers academicians policy makers students and professionals interested in contemporary debates on indigenous knowledge systems *Precarious Power* Susan Booysen, 2021-02-01 An incisive analysis of South Africa's ANC power as party as government as state South Africa's African National Congress ANC is in decline its hegemony has been weakened its legitimacy diluted President Cyril Ramaphosa's appointment suspended the ANC's electoral decline it also heightened internal tensions between those who would deepen its acquired status as corrupt and captured and those who would remodel it as redeemable These are the incontrovertible knowns of South African politics what will evolve from this is less certain In *Precarious Power* renowned political scientist Susan Booysen uses in depth research and analysis to distill that which is bound to shape South Africa's political future Booysen focuses on contradictory party politics and internal ANC dissent that is veiled for the sake of retaining an electoral following Also exposed is the incongruous populist policymaking protest politics and the use of soft law to ensure it does not alienate angry citizens fueling further discontent and protest The ANC's power has become exceedingly precarious *Precarious Power* is the name of the political game for the foreseeable future The comprehensive analysis in *Precarious Power* will appeal not only to political scientists and postgraduate students but to all who take a keen interest in current affairs **Financial Mail**, 2006-06
