## **Five Ways The Similarities:**

*Steps on the Path to Enlightenment* Lhundub Sopa, 2017-12-12 The final installment of the Steps on the Path to Enlightenment series examines the nature of reality with a master class in Buddhist Middle Way philosophy and meditation. The late Geshe Sopa was a refugee monk from Tibet sent to the United States by the Dalai Lama in 1963. He became a professor at the University of Wisconsin training a generation of Western Buddhist scholars and was a towering figure in the transmission of the Buddhism to the West. In this fifth and final volume of his commentary on Lama Tsongkhapa's masterwork on the graduated steps of the Buddhist path, Geshe Sopa explains the practice of superior insight or wisdom, the pinnacle of the bodhisattva's perfections. All the Buddhist practices are for the purpose of developing wisdom, for it is wisdom that liberates from the cycle of suffering. All other positive actions, from morality to deep states of meditation, have no power to liberate unless they are accompanied by insight into the nature of reality. With unparalleled precision, Geshe Sopa unpacks this central principle with scholarly virtuosity, guiding the reader through the progressive stages of realization.

*Designing Instruction* Judith K. March, Karen H. Peters, 2008 A fresh new approach that strengthens the need for teaching with creative thinking strategies for administrative leadership teams. Few textbooks have such detailed examples combined with the background study of best practices. The authors have great credibility, experience, resources, and abundant research to support their proposal. A very well-written text offering ample review of the research.

Sara E. Spruce, Professor of Education, Olivet Nazarene University. Use this research-based instructional model to meet students' achievement goals. As the achievement gap between advantaged and disadvantaged students gets wider, teachers and administrators need a proven process to help all students meet the requirements of NCLB. This practitioner-friendly guidebook provides a step-by-step approach to a complete standards-based curriculum and the integration of best practices into the delivery and assessment of instruction in every classroom. The authors present three capacity-building features of the design process: 1. training for building leadership teams to help teachers plan and lead the reform process; 2. stewardship training to assist district administrators and principals in supporting and sustaining the implemented reforms; and 3. a collaborative observation process to help teachers work together and in partnership with principals to monitor and improve classroom instruction. Offering an education model that has been field-tested with more than 50 school districts in the U.S. and Canada, this book shows school leaders how to maximize collaborative observation and other team leadership processes to integrate reforms into a school's existing culture. Educators will learn ways to integrate instructional design with successful instructional reform, strengthen the learning culture through standards, develop effective performance indicators, apply curriculum mapping to instructional design. *Designing Instruction* supports teachers and administrators working together to raise student achievement by using proven instructional design and best practices.
