

# FINANCIAL ACCOUNTING AND REPORTING

## Fundamental Accounting Concepts

1. **Entity Concept** – An accounting entity is an organization or a section of an organization that stands apart from other organizations and individuals as a separate economic unit.
2. **Periodicity Concept** – An entity's life can be meaningfully subdivided into equal time periods for reporting purposes.
  - Accounting period/operating cycle
  - Financial information – as of

Calendar – January-December

Fiscal – any month for the next 12 months
3. **Stable Monetary Unit Concept** – The Philippine peso is a reasonable unit of measure and that its purchasing power is relatively stable.
  - Common currency unit of measure
  - We do not account inflation

Historical Report – actual transactions

4. **Going Concern** – foreseeable future
  - for at least 12 months after the last reporting period
  - stop operation, liquidation, bankruptcy – accounting treatment

## BASIC PRINCIPLES

**GAAP (generally accepted accounting principles)** – The set of guidelines and procedures that constitute acceptable accounting practice at a given time.

**Objectivity Principle** – accounting records and statements are based on the most reliable data available so that they will be as accurate and as useful as possible.

- Reliable data are verifiable when they can be confirmed by independent observers.

**Historical Cost** – stated that acquired assets should be recorded at their actual cost and not at what management thinks they are worth as at reporting date.

**Revenue Recognition Principle** – Revenue is to be recognized in the accounting period when goods are delivered or services are rendered or performed.

- Delivered – product; rendered – service

**Expense Recognition Principle** – Expenses should be recognized in the accounting period in which goods and services are used up to produced revenue and not when the entity pays for those goods and services.

- Expense is recognized when incurred
- Matching principle

**Adequate Disclosure** – Requires that all relevant information be disclosed in the financial statement / notes.

**Materiality** – Financial reporting is only concerned with information that is significant enough to affect evaluations and decisions.

- Doctrine of convenience
- Professional judgment

**Consistency Principle** – The firms should use the same accounting method from period to period to achieve comparability over time within a single enterprise.

## UNDERLYING ASSUMPTIONS

**Accrual Basis** – the effects of transactions and other events are recognized when they occur and not as cash or its equivalent is received or paid.

- In accrual accounting, the timing of cash flows is relatively immaterial for determining when to recognize revenues and expenses.

**Going Concern** – financial statements are normally prepared on the assumption that an enterprise is a going concern and will continue in operation for the foreseeable future.

## QUALITATIVE CHARACTERISTICS OF FINANCIAL STATEMENTS

**Understandability** – readily understandable by users

**Relevance** – to be useful, information must be relevant to the decision-making needs of users.

- information has the quality of relevance when it influences the economic decisions of users by helping them evaluate past, present or future events.
- **Predictive Value** – financial information is used to predict future outcomes.
- **Confirmatory Value** – used to confirm earlier expectations.
