Mindset Mathematics: Visualizing and Investigating Big Ideas, Grade 6 Jo Boaler, Jen Munson, Cathy Williams, 2019-01-09 Engage students in mathematics using growth mindset techniques The most challenging parts of teaching mathematics are engaging students and helping them understand the connections between mathematics concepts In this volume you ll find a collection of low floor high ceiling tasks that will help you do just that by looking at the big ideas at the sixth grade level through visualization play and investigation During their work with tens of thousands of teachers authors Jo Boaler Jen Munson and Cathy Williams heard the same message that they want to incorporate more brain science into their math instruction but they need guidance in the techniques that work best to get across the concepts they needed to teach So the authors designed Mindset Mathematics around the principle of active student engagement with tasks that reflect the latest brain science on learning Open creative and visual math tasks have been shown to improve student test scores and more importantly change their relationship with mathematics and start believing in their own potential The tasks in Mindset Mathematics reflect the lessons from brain science that There is no such thing as a math person anyone can learn mathematics to high levels Mistakes struggle and challenge are the most important times for brain growth Speed is unimportant in mathematics Mathematics is a visual and beautiful subject and our brains want to think visually about mathematics With engaging questions open ended tasks and four color visuals that will help kids get excited about mathematics Mindset Mathematics is organized around nine big ideas which emphasize the connections within the Common Core State Standards CCSS and can be used with any current curriculum

Productive Math Struggle John J. SanGiovanni, Susie Katt, Kevin J. Dykema, 2020-03-09 Seldom has a book

been as timely or as necessary as *Productive Math Struggle* is today. One of the remarkable accomplishments of SanGiovanni Katt and Dykema's work lies in how they seamlessly connect the research on high quality tasks, high expectations, identity and equity to productive math struggle. This is perhaps their greatest contribution. The authors see productive math struggle as a critical feature of mathematics classrooms that support access, equity and empowerment, specifically arguing that every student is worthy of struggle. From the Foreword by Matt Larson, Ph.D., Past President 2016-2018 National Council of Teachers of Mathematics, Associate Superintendent for Instruction, Lincoln Public Schools, Nebraska: *Struggle is hard. Productive struggle is power. All students face struggle and they should. It is how they learn and grow. The teacher's job is not to remove struggle but rather to value and harness it, helping students develop good habits of productive struggle. But what's missing for many educators is an action plan for how to achieve this, especially when it comes to math. Persevering through difficult challenges to reach new learning is the core of Productive Math Struggle. When left unsupported, struggle can become unproductive and demoralizing, negatively influencing students' mathematical identities. The authors guide teachers through six specific actions including valuing, fostering, building, planning, supporting and reflecting on struggle to create a game plan for overcoming obstacles by sharing actionable steps, activities and tools for implementation. Instructional tasks and vignettes representative of each grade level. Real world examples showcasing classroom photos and student work samples. A book study guide is available under the Free Resources tab that helps math educators to learn together on how to incorporate productive math struggle in their classrooms. Revolving around the idea that math is a way of thinking and understanding and not just the pursuit of answers and procedures, this book empowers students to embrace productive struggle to build essential skills for learning and living both inside and outside the classroom.*
