## **Grade 12 Maths Literacy June Exam 2015:**

**Assessing Academic Literacy in a Multilingual Society** Albert Weideman, John Read, Theo du Plessis, 2020-11-02  
South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience. *Sociology* David M. Newman, 2016-08-16 Adapted from David M Newman's best selling *Sociology Exploring the Architecture of Everyday Life* this briefer streamlined version continues to show students how to see the unfamiliar in the familiar inspiring them to think critically about their own lives and social contexts. As in the full text the author's approachable writing style and lively personal anecdotes make the Brief Edition a text that reads like a real book. It uses the metaphors of architecture and construction to help students understand that society is not something that exists out there independently of themselves it is a human creation that is planned, formed, maintained or altered by individuals. Rather than surveying every subfield in sociology the Brief Edition focuses on the individual and society, the construction of self and society and social inequality in the context of social structures. The Praeger International Handbook of Special Education Michael L. Wehmeyer, James R. Patton, 2017-06-15 This handbook provides a concise overview of special education services in countries across the world using the Article on Education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame. The Praeger International Handbook of Special Education presents a concise and clear overview of special education services in more than 70 countries across the world using the Article on Education in the United Nations Convention on the Rights of Persons with Disabilities as the analytical frame. Each chapter offers information about the country in general followed by sections on the public education system, the private education system, the special education system, teacher training requirements and barriers to and promising trends in inclusive and special education. The volumes and chapters are organized by the United Nations Geoscheme with Volume 1 including an overview of the volumes and chapters on countries in the Americas, Volume 2 addressing countries from Europe and Africa and Volume 3 focusing on countries in Asia and Oceania. This is the most complete exploration of the delivery of supports and services to children and youth with disabilities across the globe available. The volumes do not compare among or between countries but rather provide a baseline for understanding current special education practices and their relationship with general education and inclusive practices across the globe. Readers will come

away with an in depth understanding of what is happening with regard to the implementation of special education services and Article 24 of the Convention for the Rights of People with Disabilities This valuable reference set serves researchers graduate students and policymakers in special and general education as well as professionals focused on issues of education worldwide and scholars focused on international special education As such this handbook will be an important reference source for university libraries professional associations and policy entities
