Grade 12 Maths March 2014

Xuefeng Huang

Grade 12 Maths March 2014:

Assessing Academic Literacy in a Multilingual Society Albert Weideman, John Read, Theo du Plessis, 2020-11-02 South African universities face major challenges in meeting the needs of their students in the area of academic language and literacy. The dominant medium of instruction in the universities is English and to a much lesser extent Afrikaans but only a minority of the national population are native speakers of these languages. Nine other languages can be media of instruction in schools which makes the transition to tertiary education difficult enough in itself for students from these schools. The focus of this book is on procedures for assessing the academic language and literacy levels and needs of students not in order to exclude students from higher education but rather to identify those who would benefit from further development of their ability in order to undertake their degree studies successfully. The volume also aims to bring the innovative solutions designed by South African educators to a wider international audience.

Teacher Education in Professional Learning Communities Xuefeng Huang, 2018-06-20 This book explores the unique experiences of a sister school network in Canada and China contextualized through the lens of the Reciprocal Learning Project which supports the relationship between a school network and teacher education exchange program of two countries. Huang uses theoretical viewpoints from teacher learning and comparative education research to analyse and interpret what has happened in the emerging cross cultural school network. The book juxtaposes teacher learning and comparative education research from Shanghai and Ontario as teachers in the two places interact and provides detailed descriptions of teacher collaboration to show how these collaborations were initiated, developed and sustained as well as the impact brought about from these collaborations. The book offers a unique opportunity to examine how Canadian and Chinese teachers receive and react to opportunities of cross cultural collaboration and learning.

MATHS PRACTICE BOOK: GRADE 3 TIME, CALENDAR AND MONEY Bhawna Goel, 2023-08-07 This comprehensive workbook is designed to help students in grade 3 master the fundamental concepts of time, calendar and money. With a focus on developing strong understanding of these life long important skills, this workbook is an essential tool for students looking to improve their understanding of mathematical concepts. The workbook contains a range of exercises including 120 unique worksheets: Reading the clock, writing the time in words and numerals; Reading the calendar; Learning about money notes and coins in Rupee currency; Reading and writing amounts in words; Conversion of money in different units; Basic mathematical operations like addition, subtraction and multiplication applied to money. Gradually increasing complexity of problems to provide opportunities for students to start from beginner and reach advanced levels, deepening their understanding of subtraction. Each exercise has plenty of practice problems to help students reinforce their learning. Answer keys for all problems allowing students to check their work and learn from their mistakes. Overall, this workbook is a valuable resource for students in grade 3 looking to learn about time, calendar and money. The workbooks enable the students gain skills that would be useful for not just academic pursuits as well as their entire life.

Understanding PISA's Attractiveness Florian Waldow, Gita Steiner-Khamsi, 2019-05-02

Understanding PISA's Attractiveness examines how policy makers and the media interpret the results of PISA league leaders losers and slippers in ways that suit their own reform agendas As a result a myriad of explanations exist as to why an educational system is high or low performing The chapters written by leading scholars from Australia Austria Denmark Finland Germany Norway Singapore South Korea Spain Sweden Taiwan the UK and the USA provide a fascinating account of why results from PISA and other international large scale assessments are interpreted and translated differently in the various countries The analyses in this book bring to light the wide array of idiosyncratic projections into these international tests In some countries these tests are also used to scandalise one's own educational system and to generate quasi external reform pressure Compiled by two leading scholars in comparative education Florian Waldow and Gita Steiner Khamsi this book offers a truly global perspective on the uses and abuses of PISA and will be of great interest to students and academics working in educational policy comparative education and political science and those working on large scale data sets
