Aggression and Defense, Brain Function Volume V Carmine D. Clemente,Donald B. Lindsley,2023-11-15 This volume presents the proceedings of the fifth in a series of influential conferences on Brain Function held in Pacific Palisades California and jointly sponsored by the Brain Research Institute at UCLA and the U S Air Force Office of Scientific Research Bringing together a distinguished group of experts from diverse fields ranging from neurophysiology to sociology the conference delved into the neural and behavioral foundations of aggression and defense in both animals and humans Through a multidisciplinary lens the sessions explored evolutionary perspectives on aggression analyzed human behavior in social and psychiatric contexts and addressed contemporary issues like gang violence and global conflict This volume serves as a vital resource for those interested in understanding the biological and social mechanisms underlying aggression and its implications for modern society This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1967 The Physics of Birds and Birding Michael Hurben,2025-05-20 Birding has become one of the world s most popular pastimes for good reason The vibrant colors aerial finesse and vocal talents of birds draw us to nature stimulate our admiration and pique our curiosity We cannot help but have questions as we encounter these elegant creatures How do iridescent feathers seemingly glow What must a hummingbird do to hover How does a tiny animal produce all that music By what means do some birds sense Earth s magnetic field and use it for navigation Why is it that peering through a few pieces of glass can make a distant bird seem so close Such enquiry brings us to the realm of physics The Physics of Birds and Birding sets out to blaze the best possible trail through this landscape It steers clear complex technical specialization while avoiding overused paths that lead to unsatisfying facile explanations It is a guide not just to the fascinating science of birds and birding but to the deeper connections that tie all of nature together Birders and naturalists from all backgrounds will find much of interest here both in terms of mysteries they ve long wondered about as well as some surprising linkages among what is seemingly unrelated This unique and remarkable book is an invitation to appreciate what you might not have been seeing all along **On the (Divine) Origin of Our Species** Darrel R. Falk,2023-11-30 The Bible s opening chapter includes these words So God created humans in his image in the image of God he created them male and female he created them We are created beings with a unique status in creation Nothing is

more fundamental to Christian faith Yet biologists present extensive data and provide a picture of how our species came to be but there is no Creator in the intricate details of the painting they provide If the scientific evidence for the evolution picture is reasonable and in general it is and if humans were indeed created from a common ancestor of the great apes then what can be said about the Artist who Christians believe was at work Vague answers are not satisfactory anymore not in this scientific age Recent mainstream data from paleoanthropology and genetics suggest that the basis of our species success was not that they were superior fighters Rather the reason our ancestors thrived was likely their ability to function cooperatively in groups to respect each other and to get along This reframes the question about the nature of the hovering Spirit s activity in bringing our species into being And that is the subject of this book Introduction to Teaching Gene E. Hall,Linda F. Quinn,Donna M. Gollnick,2015-12-09 Introduction to Teaching Making a Difference in Student Learning Second Edition is the ideal text for aspiring teachers Acclaimed authors Gene Hall Linda Quinn and Donna Gollnick thoroughly prepare teacher education candidates to make a difference as teachers presenting first hand stories and evidence based practices while offering a student centered approach to learning The authors target one of the biggest challenges facing many of today s schools making sure that all students are learning and help teachers make student learning the primary focus in all that they do From true to life challenges that teachers will face high stakes testing student learning assessments low teacher retention Common Core Standards to the inspiration and joy they will discover throughout their teaching careers this text paints a realistic picture of the real life of a teacher **Measuring Electronic Word-of-Mouth Effectiveness** Wolfgang Weitzl,2016-10-04 Wolfgang Weitzl introduces a novel perspective for measuring consumer trust in eWOM by applying a rigid scale development process In doing so the research aims to set new methodical standards for developing reliable valid and practicable research instruments Most importantly however the research offers valuable insights into the nature and role of consumer initiated vs marketer initiated online communication in an intercultural context by conducting a series of qualitative and quantitative surveys using samples from three countries **The Handbook of Collective Violence** Carol A. Ireland,Michael Lewis,Anthony Lopez,Jane L. Ireland,2020-04-22 The first of its kind The Handbook of Collective Violence covers a range of contexts in which collective violence occurs bringing together international perspectives from psychology criminology and sociology into one complete volume There have been significant advances made in the last 25 years regarding how collective violence is conceptualised and understood with a move away from focusing on solely individual forms of violence toward examining and understanding violence that can occur within groups This handbook presents some of the most interesting topics within the area of collective violence drawing upon international expertise and including some of the most well known academics and practitioners of our generation Structured into four parts understanding war terrorism public order and organized violent crime and gang and multiple offender groups this volume provides academics and practitioners with an up to date resource that covers core areas of interest and application Accessibly written it is ideal

for both academics and policymakers alike capturing developments in the field and offering a deep theoretical insight to enhance our understanding of how such collective violence evolves alongside practical suggestions for management prevention and intervention **Global Civil Society in International Lawmaking and Global Governance** Barbara Woodward, 2010-05-17 International law scholarship has not adequately recognised the magnitude of the role of global civil society in global governance and international lawmaking Building upon theoretical historical and legal scholarship and presenting studies of GCS actor practice in a wide range of lawmaking processes including treaty making conferences international organisations and adjudicatory mechanisms this book convincingly demonstrates that GCS actors have created and influenced the creation of norms of binding public international law and influential non binding soft or non law It presents a compelling case that calls for augmenting GCS access to information participation in legal decision making processes for those likely to be affected and access justice thereby enhancing the legitimacy of public international law

The Reformation in Economics Philip Pilkington, 2016-12-13 This book carves the beginnings of a new path in the arguably weary discipline of economics It combines a variety of perspectives from the history of ideas to epistemology in order to try to understand what has gone so wrong with economics and articulate a coherent way forward This is undertaken through a dual path of deconstruction and reconstruction Mainstream economics is broken down into many of its key component parts and the history of each of these parts is scrutinized closely When the flaws are thoroughly understood the author then begins the task of reconstruction What emerges is not a Grand Unified Theory of Everything but rather a provisional map outlining a new terrain for economists to explore The Reformation in Economics is written in a lively and engaging style that aims less at the formalization of dogma and more at the exploration of ideas This truly groundbreaking work invites readers to rethink their current understanding of economics as a discipline and is particularly relevant for those interested in economic pluralism and alternative economics
