Kaplan, 2021-09-30 This critical volume provides readers with a deep understanding of why and how to differentiate curriculum and instruction to better meet the academic social and emotional needs of advanced and gifted

learners Offering clear constructure frameworks for learning chapters focus on four key concepts review reinforce refine and redefine which help readers create individualized learning experiences and differentiate standards based curriculums Filled with specific examples lessons and units of study this essential guide emphasizes differentiation as a means to differ the What curriculum as well as the How instruction to successfully respond to the many facets of students giftedness Best Practices at Tier 1 [Elementary] Gayle Gregory,Martha Kaufeldt,Mike Mattos,2015-10-12 Improve core instruction to ensure learning for all Created specifically for grades K 5 this book provides proven response to intervention strategies to differentiate instruction engage students increase success and avoid additional interventions Discover how to identify essential power standards to include in Tier 1 instruction create a brain friendly learning environment shift instructional processes to support collaboration and more International Perspectives on Science Education for the Gifted Keith Taber,Manabu Sumida,2016-04-28 In the spirit of encouraging international dialogue between researchers and practitioners often working within isolated traditions this book discusses perspectives on science education for the gifted informed by up to date research findings from a number of related fields The book reviews philosophy culture and programmes in science education for the gifted in diverse national contexts and includes scholarly reviews of significant perspectives and up to date research methods and findings The book is written in a straightforward style for students studying international perspective modules on undergraduate but especially masters and doctoral degrees in Science Education and Gifted Education Gifted education has come to be regarded as a key national programme in many countries and gifted education in science disciplines is now of major importance to economic and technological development Despite these national initiatives and developments there are very few discussions on gifted education in science from international perspectives This will be a valued addition to the scholarship in this emergent field *Using the Parallel Curriculum Model in Urban Settings, Grades K-8* Sandra N. Kaplan,Irene Guzman,Carol Ann Tomlinson,2009-10-01 Featuring 16 field tested lesson plans this book presents a high quality curriculum that helps urban youth develop key learning skills such as resiliency self motivation and collaboration *Fundamentals of Gifted Education* Carolyn M. Callahan,Holly L. Hertberg-Davis,2013 The field of gifted education is characterized by a confusing array of perspectives concerning such fundamental issues as definition philosophy curriculum social and emotional development and underserved populations The mission of this book is to provide a coherent framework that instructors and service providers can use in planning effective programs providing appropriate counseling services and evaluating programs for the gifted Most sections are organized around fundamental issues confronting the field and follow a common structure an introductory chapter that provides historical and theoretical background and organizing questions followed by several point of view chapters written by experts that provide varied perspectives on the topic at hand Distinguishing Features Comprehensive Coverage The book s forty five manageable length chapters cover the full range of topics that must be considered in planning programs and services for gifted students both within and outside of school

Coherent Structure Section introductions provide background information and organizing questions to guide chapter authors who provide varying views of the issue at hand The emphasis is not on the right way or the wrong way except when clearly documented bad practice is discussed but on how best practice stems from well informed and logical decision making

Decision Making Focus The book s introductory chapter addresses the need for a clearly developed and consistently applied set of values to guide decision making Likewise each section introduction includes a decision making framework regarding some aspect of educating counseling or parenting gifted students This book is appropriate for introductory level courses in gifted education or courses in program development and planning It is also suitable for school personnel responsible for making program planning decisions in the area of gifted education and for academic libraries with holdings in this area
