Leadership and Management Strategies for Creating Agile Universities Connolly, Thomas M., Farrier, Stephen, 2021-12-03 The global higher education sector has changed dramatically as universities continue to face unprecedented challenges associated with the COVID 19 pandemic Many are struggling to navigate this crisis while maintaining high quality course delivery ensuring strong student recruitment numbers and providing clear communication to

staff and students Issues have emerged at an exponential rate and coping with the pandemic has been particularly difficult for universities as they serve several functions such as being educational institutions as well as major employers Leadership and Management Strategies for Creating Agile Universities reflects on the challenges that higher education institutions have faced during the pandemic and the associated projected socio economic impact yet to be felt It also considers how different universities have addressed the challenges so as to learn what has and has not worked and speculates what future implications exist for the vision of a new higher education sector in a changing world Covering topics such as developmental leadership IT governance and lifelong learning it is ideal for policymakers industry professionals academicians researchers governors decision makers teachers and students

Emotions and Leadership in Organizations and Educational

Institutes Osman Titrek, Anna Stavicka, Ana Campina, Gozde Sezen-Gultekin, Carlos Francisco De Sousa Reis, 2023-11-28

Emotion management is an important source of social capital and synergy for organizations Managers have a great role in the creation of this synergy A manager who can cope with their emotions indirectly contributes to organizational effectiveness This situation is especially important in human oriented organizations providing services rather than goods such as educational institutions Leadership is a process of social influence which maximizes the efforts of others towards the achievement of a goal Leadership stems from social influence rather than authority or power In terms of system approach the input output process and feedback of educational organizations are always related to human behaviors Therefore organizations must address the nature of human beings in all of their managerial processes Although organizations in which people are at the foreground try to continue their functioning on a rational and formal basis throughout the managerial process they sometimes have to manage emotional and informal phenomena In this case there is a need for managers and school leaders who can shape the rationale in line with the requirements of human nature What is expected from this administrator is that they do not ignore human needs and emotions while providing the management of educational institutions For this reason these managers should be leaders rather than executives who only work in a formal framework of organization management Moreover principals and teachers should also be leaders in all educational processes Emotions are the main catalyst of positive organizational culture Leaders can create an effective organizational culture with the main source of positive emotions between employers Positive emotions also motivate employees for organizational purposes If a leader wishes to create and maintain an effective organizational culture it is essential to support positive behavior and emotional climate in their institutes and schools Leaders school managers and teachers therefore need to develop emotion management abilities Educational organizations need to shape their organizational culture climate and psychology to support their leaders in efficiently managing their employees emotions Up to now this topic has been usually addressed as the main catalyst and a sub dimension of emotional intelligence Moreover current evidence classifies social and empathy skills as other sub dimensions of emotional intelligence For this reason this collection of peer reviewed articles will draw attention to

the contemporary term emotional management and contribute to educational fields by means of exploring the relationship between emotions and leadership **A New Synthesis of Public Administration** Jocelyne Bourgon,2011-09-26 In an increasingly interconnected environment shocks crises cascading failures and surprising breakthroughs are features of our age The ability to anticipate intervene innovate and adapt is now seen as essential for governments Public officials serve in an expanded public space that is being reshaped by the rise of social networking and modern information and communication technologies The desired results on many public issues exceed the reach and resources of government Technology Education and the Realisation of Vision 2010 Nigerian Association of Teachers of Technology.
