Yongnian provides a unique insight into China's approach to addressing these challenges through the lens of common prosperity. Drawing on newly published materials and empirical research, this book contrasts China's development model with Western welfare states, elucidating both the rationale behind and the implications of these differences. This translated version of Professor Zheng's recent work, originally published in Chinese, is an essential read for scholars and policymakers seeking to understand China's strategy for achieving common prosperity.

Unleashing the Power of 5GtoB in Industries Pengfei Sun, 2021-10-07 This book will delve into how new ICTs represented by 5G collectively empower industries from the perspective of theories and practices. 5G is integrating with cloud intelligence, big data, and applications to push the boundaries of industries and diversify industrial services. Starting from the background and value of industry digitalization, Section I introduces the new ICT infrastructure for industry digitalization as well as a new support system based on this infrastructure to enable 5GtoB to bring new value to industries. Section II summarizes the success factors and four key capabilities for achieving 5GtoB success from a methodological perspective. Abundant application cases are provided in Section III to explore the adoption of 5GtoB in key enterprises across industries as well as the benefits brought to these enterprises. The final section analyzes the future evolution and applications of 5GtoB. 5G enables a plethora of possibilities. We believe that this book will inspire everyone in the 5GtoB industry chain to embrace 5GtoB and take the digital transformation of industries to new heights.

Edge Assisted Mobile Visual SLAM Jingao Xu, Zheng Yang, Yunhao Liu, Hao Cao, 2024-07-29 In an age where real-time processing and interaction with the physical world through digital lenses are paramount, visual SLAM technology has become the backbone of mobile AR, VR applications, robotics, and autonomous systems. However, the demanding computational load of visual SLAM often strains the limited resources of mobile devices, hindering performance and accuracy. This is exactly where edge computing comes to the forefront, offering a potent solution by performing data processing at the edge of the network, closer to the source of data. This monograph is a pioneering exploration into how edge computing can elevate visual SLAM systems, overcoming the traditional challenges of computational intensity and resource constraints. Edge computing not only offloads heavy-duty processing from mobile devices to edge servers but also mitigates latency, enhances efficiency, and ensures robust real-time performance. This monograph unveils the transformative potential of edge-assisted visual SLAM, presenting groundbreaking research and the latest advancements in task decoupling, collaborative mapping, and environmental interaction. This monograph could serve as a scholarly resource for those within the fields of computer vision and mobile computing. It presents a detailed exploration of current research in edge-assisted visual SLAM and anticipates future developments, offering readers a comprehensive understanding of the field's trajectory and its implications for the next generation of mobile applications and autonomous systems.
